

Gardenfest Plant Sale 2019

Saturday, April 27 8am – 2pm
 PCC Rock Creek Hoop House Area Near Bldg. 4
 17705 NW Springville Road, Portland

*Catalog of Plant*s*

Spring has arrived and our thoughts and gardens are beckoning us outdoors. Washington County Master Gardener Association offers you a glance in advance of the hundreds of plant varieties that will be made available at the Gardenfest Plant Sale. All plants have been expertly selected specifically for their ability to thrive in our county and the Pacific Northwest (PNW). This catalog lists our offerings in the following categories: Annuals, Berries, Herbs, Sun & Shade Perennials, Pond Plants, Sedge/Grass, Shrubs & Trees, and finally Vegetables. An additional inventory of popular Tender/Houseplants will also be featured at the sale.

Items of Note:

***Inventory Variations:** All plants listed are in our current inventory or are to be delivered to us soon. However, between the order and delivery there may be conditions that cause crop failures. Replacements are selected with our PNW conditions still in mind.

Water Requirements: All plants need up to two (2) years to establish root structures and to stabilize metabolism before achieving their capability. Weekly watering or more may be necessary until that time. Water Efficient plants need this time to become water efficient. Attend the Focus Group Talks on Water Efficient plants at the event to find out more.

Annual vs Perennial: A plant that is perennial in one area of the world may be an annual in our climate. Frost tender plants should be treated as annuals in this area unless you move them indoor during extremes in temperature and create the proper light availability.

Sun Exposure (e.g. Full Shade) identifies the optimum growing light conditions for a plant. This information can aide you in selecting a spot in your garden just right for your plant.

Healthy ecosystems for your garden is important to everyone. Avoiding the spread of invasive plants, creatures and disease is critical. All plants and their soils are sourced to support this effort.

Focus Classes: Talks with question & answer periods will be conducted for three focus areas important to PNW gardeners. If a plant falls within any of these three areas it is indicated with the designation

Water Efficient *and/or* ***Pollinator Friendly*** *and/or* ***Small Space***

Icons of these focus areas can be found on plants at Gardenfest. Look for these icons on the plant signs.

Annuals**Calendula or Pot Marigold***Calendula officinalis*

An old-fashioned, semi-double flower in gold, peach, apricot and orange colors bloom across season if deadheaded. Flower petals are pungent and spicy and give color to soups, custards, rice and vinegars. Deer resistant.

18" H 18" W Full Sun Avg/low water

Water Efficient Pollinator Friendly

Farewell-to-Spring'Monarch' *Godetia grandiflora*

A compact variety of a native meadow flower. Alkali and sandy soil will produce best blooms. Single flowers in shades of pink will appear in late spring.

12" H 4" W Full Sun to Part Sun Avg/low water

Pollinator Friendly

Geranium'Citronella' *Pelargonium var citrosum*

Tender perennial with deeply cut crinkled and serrated soft green leaves. Strongly scented when bruised but no real value as insect repellent. Small lavender-pink blooms with deep crimson freckling.

24" H 24" W Full Sun to Part Sun Low water

Nasturtium*Tropaeolum (group)*

Showy, long-stalked, funnel-shaped, 5-petaled flowers in shades of red, orange, yellow and cream. Flowers have a spicy fragrance blooming spring to fall. They are also effective in containers, including hanging baskets. Climbing types should be trained on a support (trellis or fence). Except for roots, all plant parts (leaves, buds, flowers, pods and seeds) are edible (peppery flavor) and may be used in salads. Deer resistant.

10' H 10' W Full Sun Avg water

Sweet William'Pinks' *Dianthus barbatus*

Small blossoms and fringed petals in several shades of pink, rose, purple, burgundy or red. A biennial that blooms all summer. Deer resistant.

12" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly

Berries**Blueberry (multiple varieties)***Vaccinium sp.*

Acidic soil preferred for these deciduous shrubs. Allow the roots to establish by removing flowers before setting energy into fruit for first year or two. Edible fruit has white flesh within blackish/blue skin. Blooms are white, pink, or blue bells and emerge May though June.

variable Full Sun to Part Shade Avg/low water

Water Efficient Pollinator Friendly

Huckleberry'Evergreen' *Vaccinium ovatum* **Native**

Small, evergreen shrub foliage has reddish new growth in spring. Little urn-shaped flowers appear in spring, followed by glossy, edible, blackish-purple berries.

36" H 36" W Full Sun to Full Shade Low water

Water Efficient

Marionberry or Blackberry

'Marion' *Rubus L x Rubus*

Medium sized soft dark purple berries with excellent flavor. Thorny and vigorous. Hybrid blackberry ripens June-July.

72" H 8" W Full Sun Avg water

Raspberry

'Blackcap' *Rubus leucodermis* **Native**

Deciduous vine with attractive red first year canes. Older canes are covered in contrasting white to bluish waxy bloom (and thorns). White blooms on second year lateral shoots leading to red, dark purple or black fruits of sweet, mild flavor in May-June.

72" H 8" W Full Sun Low water

Pollinator Friendly

Salmonberry

Rubus spectabilis **Native**

Attractive deciduous, brambles that grow fast and erect from rhizomes forming dense thickets with golden, shedding bark. Throughout the summer large, reddish-purple flowers bloom on second year canes and give way to yellow-rose tinted, edible berries. Their taste (raspberry-like) varies radically from bush to bush.

10' H 72" W Full Sun to Part Shade Avg/low water

Pollinator Friendly

Strawberry

'Early Glow' *Fragaria ananassa*

The vigorous plants are easy to grow, produce strong runners and show good disease resistance. Good in cold. Medium sized berries ripen in June.

10" H 24" W Full Sun Avg water

'Quinault' *Fragaria ananassa*

The vigorous perennial plants are easy to grow, produce strong runners and show good disease resistance. Good in cold. Medium sized berries ripen in June.

10" H 24" W Full Sun Avg water

Pollinator Friendly

'Sweet Sunrise' *Fragaria ananassa*

Bright red external and deep red internal color, excellent flavor. Vigorous and durable. Medium-large fruit ripens in June.

10" H 24" W Full Sun Avg water

Pollinator Friendly

Herbs**Agastache**

'Nectar White' *Hyssop officinalis*

Firm-stalked perennial with toothy, gray-green leaves. Spikes of scented white blooms appear in Jun-Aug. Deer resistant.

18" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly

'Sun' *Agastache aurantiaca*

Firm-stalked perennial with toothy, gray-green leaves. Spikes of scented blue flowers appear in summer.

18" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly

Basil

'Fino Verde' *Ocimum basilicum*

Small-leaved basil creates a rounded annual bush.

6" H 10" W Full Sun Avg water

Small Space

Basil

'Genovese' *Ocimum basilicum*

Italian cultivar with large tasty leaves and excellent flavor. Pinch flower buds to promote vegetative growth and harvest leaves often. Great for pesto and tomato dishes.

24" H 18" W Full Sun Avg water

Pollinator Friendly

'Lemon' *Ocimum x africanum*

The distinctive narrower and slightly serrated leaves have fragrance of sweet lemon. It has white flowers in late summer to early fall.

20" H 12" W Full Sun Avg water

'Super Sweet Chen' *Ocimum basilicum*

Is the sweetest of the Italian large leaf-type. Bright green, glossy plump leaves. Slow bolting with strong aroma and good flavor for pesto.

20" H 12" W Full Sun Avg water

Pollinator Friendly Small Space

Borage

Borago officinalis

The star-like flowers can be frozen in ice for summer drinks, and the flowers and the new leaves (cucumber-flavored) are tasty in salads. Borage stays attractive and green long into the fall and readily self-sows for the next season. Blooms June-September.

36" H 24" W Full Sun Avg water

Pollinator Friendly

Chives

'Garden' *Allium schoenoprasum*

Chives belong to the same family as onion, leeks and garlic. Perennial that grows from underground bulbs. Round pink flowers produced in mid-summer. Deer resistant.

12" H 18" W Full Sun to Part Sun Avg/Low water

Water Efficient Pollinator Friendly Small Space

'Garlic or Chinese' *Allium tuberosum*

A vigorous perennial this chive has tall tufts of flattened, dark green foliage. The tender leaves have a very clean, delicate flavor and aroma with a distinct, garlicky overtone. Balls of fragrant, tiny star-shaped, white flowers bloom late summer.

18" H Full Sun to Part Sun Avg water

Pollinator Friendly

Cilantro

'Slow Bolt' *Coriandrum sativum*

Annual leafy green shoots from coriander seed. Enhances salsas and curries with sweet, spicy flavor. Sometimes called Chinese Parsley or Coriander. Blooms mid summer.

24" H 18" W Full Sun Avg water

Pollinator Friendly

Costmary

Tanacetum balsamita

A perennial with broad, grey-green leaves has an aroma of mintish-camphor and forms a spreading clump. Perfect dried for potpourri or can be used as a moth repellent. Loose clusters of whitish-yellow button flowers in summer. Deer resistant.

30" H 30" W Full Sun to Part Sun Low water

Curry Plant*Helichrysum angustifolium*

AKA Helichrysum italicum. Beautiful silvery foliage adorns this shrub with the exotic, spicy fragrance of curry. The bright yellow buttons flower all summer long, and are excellent for drying. It can be used to flavor meats and other types of dishes. Deer resistant.

24" H 40" W Full Sun Low water

Water Efficient Pollinator Friendly

Dill'Bouquet' *Anethum graveolens*

Early-flowering plants produce large blooms, seed umbels, and foliage on long stems, making it the preferred dill for cut flower use and pickling. Edible seeds, flowers, and greens flavor many foods. Popular addition to sauces, salads, and soup. Foliage known as dill weed. Deer resistant.

48" H 12" W Full Sun Avg/Low water

Pollinator Friendly

Dill'Fernleaf' *Anethum graveolens*

Dwarf variety, heirloom annual with aromatic feathery leaves and seeds. Used in pickling, vinegars, sauces, salads and seafood recipes. Large, yellow flowers appear mid-summer. Deer resistant.

24" H 12" W Full Sun to Part Shade Low water

Pollinator Friendly Small Space

Lavender'French' *Lavandula x intermedia*

Fragrant purple blooms, soft grey fragrant foliage. Tender perennial. Dries well. Well suited for cut flowers.

30" H 30" W Full Sun Low water

Water Efficient Pollinator Friendly

'Grosso' *Lavandula x intermedia*

A classic French hybrid perennial lavender grown for its fragrant dark blue flowered spikes and vigorous growth. Nice wide gray-green foliage. It is a large grower and blooms heavily providing an ample harvest in mid to late summer. Deer resistant.

30" H 24" W Full Sun Low water

Water Efficient Pollinator Friendly

Lemon Balm*Melissa officinalis*

A bushy herbaceous perennial of the mint family that is typically grown in herb gardens and border fronts for its lemon-scented leaves. White to pale yellow flowers bloom June-August. Deer resistant.

24" H 36" W Full Sun to Part Sun Avg/low water

Lemon Grass'East Indian' *Cymbopogon flexuosus*

A tender perennial that is not hardy in Willamette Valley so may become an annual. The useful part of the plant is the long blue-green leaves. They are thin and flexible, so they bend over and give the entire clump a soft grassy look. As cool weather arrives in the fall, the leaves take on a reddish-bronze coloration. Chopped up as infusion lemon flavor or scent in many ethnic dishes.

24" H 36" W Full Sun Avg water

Pollinator Friendly Small Space

Mint'Chocolate' *Mentha x piperita*

Has attractive, chocolate fragrance and colored veins and easy to grow. As with most square-stemmed members of the mint family it can take over the area in which it is planted. Blooms in mid-summer. Deer resistant.

24" H 24" W Part Sun to Part Shade Avg water

Pollinator Friendly

Mint

'Kentucky Colonel' *Mentha spicata*

Pink to purple-hued flowers in summer. Dark green foliage has a fresh spearmint fragrance. Excellent dried or fresh. A perennial spearmint spreads quickly so should be kept contained in 15" deep bottomless boundary. Tough, undemanding and difficult to kill, this herb is decidedly unfussy about growing conditions.

24" H 24" W Part Sun to Part Shade Avg water

Pollinator Friendly

'Mojito' *Mentha x villosa*

This culinary herb provides the distinct, aromatic and complex taste of mild mint with hints of citrus to the celebrated beverage. The leaves may be used fresh or dried in many dishes and drinks.

24" H 24" W AM Sun to Part Shade Avg water

Pollinator Friendly

'Peppermint' *Mentha x piperita*

Features rounded to lance-shaped toothed, dark green leaves with terminal spikes of small pink to lavender flowers in summer that rarely set seed. Peppermint may be used to flavor teas, as a garnish or in potpourris.

18" H 18" W Part Sun to Part Shade Avg water

Pollinator Friendly

'Spearmint' *Mentha spicata*

Features oval to lance-shaped dark green leaves with terminal spikes of small lilac to pink to white flowers in summer. Leaves have a strong spearmint fragrance and taste, and may be used to flavor teas, in salads, as a garnish or in potpourris.

18" H 18" W Part Sun to Part Shade Avg water

Pollinator Friendly

Oregano

'Aureum' *Origanum vulgare*

Golden oregano is a robust perennial creeper with tiny, rounded leaves 1/2 to 1 inch wide. Small, pink or lavender to purple flowers stand out above the foliage in early to late summer. Deer resistant.

18" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

'Cuban' *Plectranthus tomentosus*

Semi-succulent trailing herb has a minty, camphor fragrance. Develops purple blooms in summer. Not frost hardy. Usually cooked down for strong flavored oil in Mexican cuisine.

12" H 12" W AM Sun to Part Shade Keep Soil moist

'Golden' *Origanum vulgare*

Golden oregano is a robust perennial creeper with tiny, rounded leaves 1/2 to 1 inch wide. Small, pink or lavender to purple flowers stand out above the foliage in early to late summer. Deer resistant.

18" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

'Greek or True' *Origanum vulgare x hirtum*

Compact perennial with gray-green leaves and small purple or white flowers. Deer resistant.

24" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

'Greek or True' *Origanum vulgare x hirtum*

Compact perennial with gray-green leaves and small purple or white flowers. Deer resistant.

24" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

Oregano Ornamental

'Hopley's Purple' *Origanum laevigatum*

Features long wands of purple-pink flowers in late summer and fall, over a trailing mound of fragrant, green foliage that turns reddish-purple in fall. Deer resistant perennial.

Full Sun Low water

Water Efficient Pollinator Friendly Small Space

Parsley

'Italian (Flat Leaf) or Neapolitan' *Petroselinum crispum*

Heirloom variety. Flat, glossy, dark green leaves. Best flavor for culinary uses, a nutritious and tasty addition to meat or vegetable dishes. Deciduous biennial in this region.

24" H 16" W Part Sun to Part Shade Avg water

Pollinator Friendly Small Space

'Triple Curl' *Petroselinum crispum*

Popular herb and garnish is high in iron and vitamins A & C. Foliage stays fresh and attractive until hard frost, or all winter in mild climates. Deciduous biennial in this region.

10" H 12" W Part Sun to Part Shade Avg water

Pollinator Friendly Small Space

Rosemary

'Irene' *Rosmarinus officinalis*

A colorful creeping rosemary. This spectacular evergreen variety bursts into bloom with a large, intense periwinkle hued flower in early spring or late autumn. Deer resistant.

18" H 72" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

'Lockwood de Forest' *Rosmarinus officinalis*

A creeping or prostrate rosemary. The evergreen, bright green foliage is covered during the spring bloom with pale blue flowers with often its strongest flowering display in winter with sporadic bloom through fall.

24" H 80" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

'Tuscan Blue' *Rosmarinus officinalis*

An excellent choice if you want a tough evergreen plant, as it is considered one of the hardiest varieties. Good for cooking and landscaping.

80" H 4" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Sage

'Purple or Purpurascens' *Salvia officinalis*

Distinctive, deep green foliage is overlaid with a violet-purple cast. Blooms May-Jun. It makes a striking border accent that is excellent for culinary use as well. A biennial that is deer resistant.

18" H 24" W Full Sun Low water

Water Efficient Pollinator Friendly

Savory

'Creeping Winter' *Satureja montana*

Perennial with leathery, dark green leaves. Flowers appear between July and October and range in color from pale lavender to white. They are smaller than summer savory flowers.

16" H 18" W Part Sun to Part Shade Avg/Low water

Tarragon

'French' *Artemisia dracunculus sativa*

A true French tarragon, which cannot be grown from seed. The dark green foliage has a wonderful flavor suggesting anise or mint. Deer resistant.

36" H 24" W Full Sun Avg/low water

Water Efficient

'Spanish' *Tagetes lucida*

Spanish tarragon has the sweetness of licorice. This dark green, herbaceous perennial is easy to grow. It flowers (only where winter comes very late) with small, single, gold daisy-shaped blooms that taste like grass. Not frost hardy.

30" H 18" W Full Sun Avg water

Water Efficient

Thyme

'Compacta' *Thymus vulgaris*

This perennial garden herb makes a neat, spreading mound of aromatic green leaves. Through the summer it is covered in masses of tiny pink-purple flowers.

10" H Full Sun Avg water

Water Efficient Pollinator Friendly Small Space

'Creeping' *Thymus longicaulis*

This fast growing evergreen, groundcover spreads several feet in one year. A variety with big green leaves, red stems and soft pink flowers in the spring. It seems to tolerate more foot traffic than most thymes. Deer resistant.

4" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly

'English ' *Thymus vulgaris*

The variety most commonly used in cuisine, as the small, dark gray-green leaves are aromatic and easy to harvest by letting the stems dry in place. Pale pink flowers bloom at the tips of the stems in summer. Drought tolerant groundcover.

8" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

'Foxley' *Thymus pulegioides*

Forms a dense low mat with spikes of lilac-white flowers throughout summer with beautiful fragrant variegated foliage. Can take light foot traffic.

8" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly

'German Winter ' *Thymus vulgaris*

Thyme is used as a salt and pepper substitute. This evergreen landscape plant with pale pink flowers is a drought tolerant groundcover.

8" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly

'Lemon' *Thymus citriodorus*

This deep green foliage forms a dense evergreen groundcover for small open areas. Tiny pale pinkish purple flowers. Lemon flavored foliage adds zest to marinades and sauces. Evergreen.

8" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly

Vietnamese Coriander

Persicaria odorata

AKA cilantro and used in many Asian dishes. The top of its leaf is dark green, with chestnut-colored spots, while the underside is burgundy red. Keep soil moist. Not frost hardy annual herb.

12" H 12" W AM Sun to Part Shade High humidity

Perennial - Shade**Ajuga Bugleweed**'Burgundy Glow' *Ajuga reptans*

Blue flower spikes rise above a colorful low mat of burgundy-rose, white and green variegated foliage in spring. Great for erosion control. A deer resistant ground cover.

8" H 16" W Full Sun to Part Shade Avg water

Pollinator Friendly Small Space'Chocolate Chip' *Ajuga reptans*

Dense evergreen groundcover of shiny chocolate brown leaves with dark green undertones. Blue flowers on 10" spikes appear May-June. Not great for foot traffic but is deer resistant.

3" H 16" W Full Sun to Part Sun Low water

Water Efficient Small Space'Golden Glow' *Ajuga reptans*

Gold and green variegated, evergreen foliage forms low mats. Blue flowers provide a wonderful contrast in spring. Fast growing groundcover. Deer resistant.

6" H 16" W Part Shade to Full Shade Avg water

Small Space**Ajuga Bugleweed**'Pink Lightening' *Ajuga reptans*

Fast growing variegated, evergreen groundcover quickly forms a low carpet of medium-sized, ruffled leaves, in an attractive mint green shade with creamy-white edging. Short spikes of pink flowers emerge in mid to late-spring. Light foot traffic tolerated and deer resistant.

6" H 16" W Full Sun to Part Shade Avg water

Small Space'Silver Queen' *Ajuga reptans*

Beautiful groundcover with year-round, grey-green leaves splashed with cream. Foliage turns pinkish-green in winter months. Blue spikes reaching 6" appear in the spring. Prefers a moist but well-drained soil. Fast growing groundcover and deer resistant.

8" H 16" W Full Sun to Full Shade Avg water

Pollinator Friendly Small Space**Bleeding Heart**'Pacific' *Dicentra formosa* **Native**

Gray-green ferny foliage sports delicate light pink heart-shaped flowers. Naturalizes to form a nice colony in the woodland garden. Blooms remain April through September. Deer resistant.

24" H 24" W Part Shade to Full Shade Avg/Low water

Pollinator Friendly**Boat Lily***Rhoeo spathacea*

Not frost tolerant, houseplant with succulent stems. Leaves are crowded, flat, stiff, pointed, dark green above and purple to green below. Small white flowers form at base of leaves. Not edible.

12" H 18" W Full to Part Sun Avg water

Bugbane'Hillside Black Beauty' *Actaea simplex*

Noted for its ferny, coppery-purple foliage and fragrant white flowers in tall spires blooming in September to October. Water well.

60" H 36" W Full Shade to pt Shade Avg water

Clubmoss*Selaginella kraussiana*

Low growing spreading evergreen groundcover also called ground pine due to scale or needlelike leaves. Not a true moss and has a similar structure to ferns (spores). High humidity required for the feathered bright green foliage.

4" H 18" W Part Shade to Full Shade Keep moist

Small Space

False Spirea'Peach Blossom' *Astilbe x japonica*

Airy soft peachy-pink, 2' plumes arch gracefully over handsome green foliage in late spring. Deer resistant.

24" H 24" W Part Shade to Full Shade Avg water

Pollinator Friendly

Fern - Lady Fern'Cyclosorum' *Athyrium filix-femina* **Native**

A deciduous fern that features lacy-cut, erect or ascending, 2 to 3-feathered, light green fronds which grow in a dense circular clump. Each frond (leaf) has twenty to thirty pairs of leaflets with narrow pointed tips.

36" H 36" W Part Shade to Full Shade Keep moist

Fern - Male'Linearis polydactyla' *Dryopteris filix-mas* **Native**

Semi-evergreen. This is a large, arching, deciduous male fern with erect, stout rhizomes and medium green blades (fronds). Blade is feathered with 20-30 pairs of long-pointed leaflets per blade. Each leaflet is divided into short, rounded, finely-serrated pinnules (sub-leaflets). Sori (fruit dots) on the leaflets are located closer to the midvein than the margin. Keep moist.

36" H 36" W Part Shade to Full Shade Keep moist

Fringe Cup*Tellima grandiflora* **Native**

From the round and scalloped leaves emerge 2' wands, each bearing 50 or more ½" delightful, pale cream or greenish flowers with pale fringe recumbent on the bell shaped blooms. As the fragrant flowers mature, the fringe turns rosy pink in late spring.

24" H 24" W Part Shade Avg water

Water Efficient

Indian Rhubarb*Darmera peltata* **Native**

Pink blooms in spring with large rounded and lobed leaves. Deciduous. Also known as Umbrella Plant.

48" H 36" W Full Shade to Full Shade Moist or boggy soil

Iris - New Zealand Satin Flower*Libertia grandiflora*

Evergreen grassy clump forming with leathery linear leaves and white flowers in early summer. Marginally hardy.

36" H 36" W Full Sun to Part Shade Avg water

Lobelia'Great Blue/Blue' *Lobelia siphilitica*

Dramatic spikes of large deep blue flowers make this a late summer blooming knockout. Provide rich soil and ample moisture for best performance. Deer resistant.

36" H 18" W Full Sun to Full Shade Avg water

Pollinator Friendly

Lungwort'Trevi Fountain' *Pulmonaria x hybrida*

Perfect for shady, moist locations, 'Trevi Fountain' lights up the darkness with its narrow green leaves spotted with silver. Clusters of deep cobalt-blue flowers appear in early spring. The foliage is heat tolerant and mildew resistant.

12" H 24" W Part Shade to Full Shade Avg wat

Pollinator Friendly Small Space

Mukdenia

'Crimson Fans' *Mukdenia rossii*

Palmate, rounded, 5-9 lobed, medium green leaves (to 5" long) are tinged with bronze. Leaves are attractive throughout the growing season. White, bell-shaped flowers rise on naked stems above the foliage clump in April/May. Deciduous groundcover.

12" H 18" W AM Sun To Part Shade Avg water

Peacock Spikemoss

Selaginella uncinata

A perennial, false moss. Unusual rich blue-green foliage, making a beautiful carpet that lends itself to creating all kinds of interesting contrasts in the garden or in containers.

6" H 24" W Full Shade High humidity

Small Space

Pocketbook Flower

'Gold Cap' *Calceolaria biflora*

This petite, evergreen charmer is adorned with sweet, pouch-like blooms of golden-yellow dotted with red, in late spring and summer. Perfect for the shady rock garden.

4" H 8" W Part Shade to Full Shade Low water

Water Efficient Small Space

Saxifraga

'Primuloides' *Saxifraga x urbiium var.*

A dwarf version of London Pride and a good evergreen groundcover for shady areas. Dark green, leathery rosettes of foliage spread like strawberries along runner stolons. Small spring white flowers on 10" stems will emerge in spring if light sun is present.

3" H 12" W Part Shade to Full Shade Low water

Water Efficient

Sedum

'Donkey Tail' *Sedum morganianum*

Tropical ornamental grown for distinctive trailing foliage of blue-green tails. Rarely blooms, its summer showy pink to red blossoms (on mature stems). A slow growing houseplant always needing greater than 40F.

48" H 12" W Full Sun to Partial Shade Low

Water Efficient Pollinator Friendly

Sedum

'Stonecrop' *Sedum makinoi*

Fabulous evergreen contrast plant with bright, light green foliage, tiny leaves, and a low, creeping habit. Yellow flowers appear in summer. Makes a great groundcover

4" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

Sedum

'Ogon' *Sedum makinoi*

Bright golden foliage, tiny leaves, and a low, creeping habit with greenish-yellow flowers appear in summer. Best in filtered shade. Ground cover.

2" H 12" W AM Sun To Part Shade Low water

Water Efficient Pollinator Friendly Small Space

Sensitive Fern*Onoclea sensibilis*

Features long-stalked, deeply feathered, fern-like, bright green, leathery fronds. The fronds are sensitive to and suffer almost immediate damage from the first fall frost. Fronds will brown up starting late summer and persist through winter. These shorter woody fronds are still fertile.

36" H 36" W Full Sun to Part Shade High humidity

Snowdrop Anemone*Anemone sylvestris*

Delicate single white flowers with golden yellow centers atop fresh green foliage. While great for naturalizing in rockeries and in sunny woodland borders, it does fine in full shade. Slightly fragrant. Mar/Ap bloom. Deer resistant.

16" H 16" W Part Shade Avg water

Water Efficient Pollinator Friendly

Solomon's Seal*Polygonatum odoratum*

This lovely 2-footer blooms in May and June with small white sweet-scented, bell flowers, usually in pairs, that dangle beneath the variegated leaves. Leaves have creamy edges on spear-shaped foliage. Blooms May-Jun.

24" H Part Shade to Full Shade

Spike Moss'Emerald Isle Moss' *Selaginella moellendorffii*

Feathery, fernlike foliage creates a delicate, low-growing evergreen carpet. Not a true moss and has a similar structure to ferns (spores).

12" H 1" W Part Shade to Full Shade Keep moist

Spurge - Japanese'Silver Edge' *Pachysandra terminalis*

An evergreen groundcover slowly spreads by rhizomes. Has white edged leaves. Blooms are 1"-2" white spikes in late spring. Deer resistant.

8" H 18" W Part Shade to Full Shade Low water

Water Efficient

Perennial - Sun**Adriatic Bellflower**'Dickson's Gold' *Campanula garganica*

Evergreen groundcover with star-shaped, blue flowers emerging in May/June.

5" H 12" W Full Sun to Part Sun Avg water

Agapanthus "Lily of the Nile"'Blue Storm or ATIBlu' *Agapanthus praecox ssp orientalis*

Compact, easy care and drought tolerant, Blue Storm produces more flower stems than any other agapanthus. It flowers on average 10 weeks per season. Sky blue blooms on 30" stalks appear in mid-spring. A fast growing evergreen.

12" H 18" W Full Sun to Part Sun Avg/low water

Water Efficient

'Headbourne Hybrid' *Agapanthus headbourne hybrid'*

A hardy variety that produces large rounded clusters of 3-4" wide flowers in variable shades of light and dark violet-blue. Each flower head is packed with 70 plus florets. They rise on stiff, upright stalks atop clumps of beautiful evergreen to semi-evergreen grass-like leaves. Deer resistant.

36" H 18" W Full Sun to Part Shade Avg/Low water

Water Efficient Pollinator Friendly

Agapanthus or Lily of the Nile

'Summer Sky (Skies)' *Agapanthus x Summer Skies*

Throughout midsummer into early fall, rounded bundles of star-shaped, pale blue flowers streaked with deeper blue veins bloom vigorously on strong, soaring stalks.

30" H 24" W Full Sun to Part Sun Avg/low water

Pollinator Friendly Small Space

Agastache

'Navajo Sunset' *Agastache aurantiaca*

Citrus-scented foliage and bright orange-red tubular flowers all summer long! Irresistible to butterflies and hummingbirds, and perfect in the mixed border. Deer resistant.

24" H 28" W Sun/pt Shade Low water

Water Efficient Pollinator Friendly

Alstroemeria or Peruvian Lily

'Inca Lolly' *Alstroemeria aurea*

Bright pink freckled blooms summer into fall. Well drained soil preferred.

14" H 16" W Full Sun to Part Shade Avg

Pollinator Friendly

Alstroemeria or Peruvian Lily

'Red Inticancha' *Alstroemeria x var.*

Inticancha is a series of strong pot alstroemerias that are easy to maintain and will flower continuously from spring until autumn. This variety will bloom red flowers all summer.

14" H 13" W Full Sun to Part Shade Avg water

Pollinator Friendly Small Space

Amsonia

'Blue Star or Halfway to Arkansas' *Amsonia ciliata*

Star-like, sky-blue flowers appear in spring over feathery foliage that forms rounded, upright mounds. The amazing yellow fall color comes a bit later than other Amsonias and is showiest when planted in full sun. Deer resistant.

36" H 36" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly

Aster

'Douglas' *Aster subspicatus or Symphyotrichum subspicatum* **Native**

This perennial will bloom into the late summer and thrives on saltwater shorelines. The rather lanky stems are topped with bluish purple flowers that look like miniature daisies (ray flowers). Douglas aster spreads by underground stems (rhizomes) which is great if you want free plants, but can require maintenance if you don't.

36" H 12" W Full Sun to Part Shade Avg water

Pollinator Friendly

'Purple Dome' *Symphyotrichum novae-angliae*

Purple blooms Aug-Sep. Mounds of royal purple cover big bushy plants that bloom well into frost-free autumn weather.

36" H 36" W Full Sun to Part Sun Avg water

Pollinator Friendly

Austrian Speedwell

'Ionian Skies' *Veronica austriaca*

Particularly compact, bearing spikes of soft china-blue flowers in early summer. Shear back by half after blooming, if desired, in order to maintain a nice tight habit. Easily divided in spring or early autumn.

6" H 16" W Full Sun to Full Shade Avg water

Barren Strawberry*Waldsteinia fragarioides*

Sunny yellow flowers are scattered over strawberry-like, evergreen foliage in spring. A tough, mat-forming groundcover that tolerates a wide range of soils and conditions. Inedible berries in summer. Deer resistant.

6" H 12" W Full Sun to Part Sun Avg/low water

Water Efficient Pollinator Friendly

Bear's Breeches*Acanthus mollis*

Dramatic architectural plant with large tropical-looking, deep green, glossy leaves. Stunning purple and white spikes make a striking display in Jun-Sept. Tolerates nearly any kind of soil.

60" H 48" W Full Sun to Part Shade High water

Pollinator Friendly

Bee Balm'Balmy Purple' *Monarda didyma*

Shaggy, purple flowers mid to late summer very fragrant. Edible flowers.

12" H 10" W Full Sun Avg water

Pollinator Friendly

'Jacob Cline' *Monarda didyma*

In summer, large true red blooms top tall, green, mildew resistant foliage on this vigorous growing cultivar. The flowers are very attractive to hummingbirds and butterflies. Deer resistant.

60" H 36" W Full Sun to Part Shade Avg/low water

Pollinator Friendly

'Raspberry Wine' *Monarda didyma*

Clear wine-red flowers emerge in summer from raspberry-hued buds. A long lasting, fragrant, heavy bloomer with very good mildew resistance. Hummingbird favorite!

42" H 36" W Full Sun to Part Shade Avg/low water

Pollinator Friendly

Bergenia'Elephant Ears' *Bergenia agavifolia*

This unusual Bergenia has round, flat, olive green leaves edged in burgundy. They turn a lovely purplish red during the colder months, and are topped by sparkling white blooms with pink calyxes in early spring. Very pleasing and unusual!

12" H 16" W Full Sun to Full Shade Low water

Water Efficient Pollinator Friendly Small Space

Blanket Flower'Burgundy' *Gaillardia x grandiflora*

Deep wine to rusty-red flowers attract attention in late summer. Deadhead to promote bloom. Deer resistant.

24" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

'Sunset Sunrise' *Gaillardia grandiflora*

Low mound of gray-green hairy leaves, bearing strong, upright stems. The flowers are made up of single rows of flat petals in a vibrant color and fringed in varying shades of yellow. This selection features two rows of flat petals in orange and golden yellow from early summer to early fall.

16" H 16" W Full Sun Low water

Water Efficient Pollinator Friendly

Blue Flax

'Sapphire' *Linum perenne*

Sky-blue flowers bloom continuously April to September. This dwarf plant looks deceptively delicate, with a wildflower appearance. A good cut flower too, and quite drought tolerant.

10" H 16" W Full Sun Avg water

Water Efficient

Burnet

'Red Thunder' *Sanguisorba officinalis*

Over the blue-green toothed leaves, tall sturdy stems emerge in late summer topped with deep rich ruby-red bottle-brush flowers creating a distinctive silhouette.

48" H 36" W Full Sun to Part Shade High/Avg water

Pollinator Friendly Small Space

Butterfly Weed

Asclepias tuberosa

Typically grows in a clump and features clusters (umbels) of bright orange to yellow-orange flowers atop upright to reclining, hairy stems with narrow, lance-shaped leaves. Unlike many of the other milkweeds, this species does not have milky-sapped stems. Flowers give way to prominent, spindle-shaped seed pods (3-6" long) which split open when ripe releasing numerous silky-tailed seeds for dispersal by the wind. Seed pods are valued in dried flower arrangements. Blooms Jun-Aug. Deer resistant.

36" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly

Camas Lily

'Greater Camas' *Camassia leichtlinii* **Native**

A perennial with star-like, slender petaled blossoms of creamy blue or white on tall, 2-4' spikes in late spring, about three weeks after Common Camas. Greater Camas is found only on the west side of the Cascades.

48" H 24" W Full Sun to Part Shade Avg/Low water

Water Efficient Pollinator Friendly

Campanula

'White' *Campanula sp.*

A low growing mounded perennial with toothy, rounded bright-green leaves and white bell shaped flowers blooming in early summer into fall.

24" H 24" W Full Sun to Part Sun Avg/low water

Campanula - Korean Bellflower

'Elizabeth' *Campanula takesimana*

Low maintenance when grown in underplantings around shrubs and trees or in part shade border areas. Foliage is generally semi-evergreen. Glossy, leathery, heart-shaped, dark green leaves (to 4" long) with toothed margins form basal rosettes. Reddish, leafy flower stems rise from each rosette to as much as 3' tall in late spring, each bearing an inflorescence of tubular-campanulate, pendant, lantern-like, lilac-white flowers (each to 2" long) with maroon interior. spotting. Flowers bloom from June to August.

24" H 18" W Full Sun to Part Shade

Campanula - Spotted Bellflower

'Cherry Bells (rubriflora)' *Campanula punctata*

Large, drooping, tubular, cherry-red colored, bell-like flowers (to 2" long) with purple inside spotting appear atop erect to slightly arching stems. Stems rise up from basal rosettes of rounded, toothed, medium green leaves (to 5" long). Long summer bloom. Pink bells early to late summer.

24" H 30" W Full Sun to Part Shade Low water

Water Efficient

Candytuft*Iberis sempervirens*

White flowers in spring top short, broad, evergreen leaves. Grows to form a wide cushion that is perfect for rock gardens, borders or groundcovers.

18" H 36" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Canna Lily'Bronze Orange' *Canna x generalis*

Cannas are large tropical plants that produce gladiolus-like flower spikes in summer atop erect stems sheathed in large paddle-shaped leaves. Not hardy so in colder areas dig up rhizomes for winter storage. Bronze-Orange flowers Blooms summer through fall.

48" H 20" W Full Sun Avg water

Pollinator Friendly

Geranium Bloody Cranesbill

'Lancastriense or striatum' *Geranium sanguineum*

Masses of delicate pink flowers with fine red veining emerge atop June through September. Deer resistant.

10" H 18" W Full Sun to Part Sun Avg water

Pollinator Friendly

Gerbera Daisy

'Garvinia Sweet Smile' *Gerbera x Sweet Smile*

Bred specifically for outdoor performance, Sweet Smile features sunny yellow, single flowers with green centers held on strong stems that are excellent for cutting. Sturdy perennial in mild climates; treat as an annual elsewhere. Yellow blooms spring to fall.

18" H 18" W Full Sun to Part Shade Avg water

Water Efficient Pollinator Friendly

'Gerbera Sweet Spice' *Gerbera jamesonii*

Features large, magenta-pink flowers with a yellow inner collar and black centre held on strong stems. Excellent for cutting. Demonstrates a high resistance to pests and disease. Flowers late spring to mid fall.

15" H 15" W Full Sun High/Avg water

Pollinator Friendly

Geum

'Fire Lake' *Geum x coccineum*

This upright-growing perennial has large 6" leaves and vivid, fiery red-orange semi-double flowers that rise on tall stems. Blooms in Apr-Jun but deadhead to promote second blooming.

12" H 12" W Full Sun to Part Shade Avg water

Pollinator Friendly Small Space

'Queen of Orange' *Geum coccineum x borisii*

This 'Queen' blooms profusely and early! A semi-evergreen perennial covered with numerous warm orange flowers with yellow centers; blooms Mar-June. Deer resistant.

15" H 16" W Full Sun to Part Sun Avg water

Pollinator Friendly Small Space

Giant Sea Holly

Eryngium giganteum

A large, coarse, thistle-like, clump-forming biennial or short-lived perennial that will reseed. Bluish-silver flowers and heartshaped green leaves. Also called Miss Willmott's Ghost.

36" H 24" W Full Sun Low water

Water Efficient Pollinator Friendly

Goat's Beard

Aruncus aethusifolius

A dwarf goat's beard, is a clump-forming perennial which features fern-like, compound, 3-4 feathery, dark green leaves which form a foliage mound to 4-6" tall. Plumes of tiny, creamy white flowers rise above the foliage to 12" tall in late spring.

12" H 18" W Full Sun to Part Shade Avg water

Grassy Bell*Edraianthus tenuifolius*

This ornamental grass has tufts of narrow grass-like leaves, and in early summer, lovely upward facing purple flower clusters appear. It does not like to be wet during the winter, so good drainage is critical.

4" H W Full Sun to Part Shade Low water

Water Efficient **Small Space**

Hardy Fuchsia'Celia Smedley' *Fuchsia magellanica*

Bears masses of large, single flowers with dark pink tubes and currant-red skirts (corollas). It is a strong, upright grower, perfect for training into different shapes.

36" H 24" W Full Sun to Part Shade Low water

Pollinator Friendly

'David' *Fuchsia magellanica*

Quickly forms a rounded mound of small leaves and is very floriferous with slender jewel like, glowing ruby red flowers with purple corollas and elongated red stamens.

36" H 36" W Full Sun to Part Sun Low water

'Jingle Bells' *Fuchsia magellanica*

Large flowered hardy fuchsia with big red and white flower all summer. Laxly upright variety.

18" H 18" W Full Sun to Part Sun Low water

Hardy Fuchsia'June Bride' *Fuchsia magellanica*

This tall shrub bears single flowers with red corolla and purple sepals.

60" H 60" W Full Sun to Part Sun Low water

'Mephisto' *Fuchsia magellanica*

A very large and well-shaped shrub with eye-catching flowers. The tubes are scarlet, the sepals scarlet and the single corollas are crimson.

48" H 36" W Full Sun to Part Sun Low water

'Roesse Blacky' *Fuchsia magellanica*

Is even smokier in flower color than 'Maxima' and its flowers and foliage are larger. With very glossy purple red sepals which recurve to almost upright position revealing matte red undersides and very dusky, near black corolla, the flowers of Fuchsia 'Roesse Blacky' are very exotic and mysterious, and complemented by midgreen foliage which is somewhat rounded with red central veins that echo the flower.

18" H 18" W Full Sun to Part Sun Low water

'Rufus' *Fuchsia magellanica*

It is the size of the flowers that makes this fuchsia readily identifiable. At 2 inches long and 2.5 inches wide, they certainly draw attention to themselves. The red flower tube descends to glossy red sepals which only slightly recurve above the matte red corolla. Fuchsia 'Rufus' is an open-habited, mid-sized shrub.

30" H 30" W Full Sun to Part Sun Low water

'Turkish Delight' *Fuchsia magellanica*

A compact shrub with single flowers. The sepals are light pink and the corollas are dark purple. Blooms all summer.

15" H 18" W Full Sun to Part Sun Low water

'Voodoo' *Fuchsia magellanica*

Blooms throughout summer until first frost.

36" H 6" W Full Sun to Part Sun Low water

Helen's Flower or Sneeze weed

'Moerheim Beauty' *Helienium x hybrida*

Beautiful flowers in velvety, coppery-red hues, glow in the mixed border.

Maiden Pinks

'Flashing Light' *Dianthus deltooides*

This charming, mat-forming Dianthus features hundreds of ruby red flowers held on wiry stems atop mahogany foliage. This heavy bloomer will keep going strong from June to September. Deer resistant.

8" H 12" W Full Sun to Part Shade low water

Water Efficient Pollinator Friendly Small Space

Marigold or Signet Marigolds

'Gems' *Tagetes tenuifolia*

A mounding plant with a never ending display of petite, edible marigold flowers ranging in colors from classic deep reddish orange, to dusty tangerine and lemon yellow. Have a strong and slight citrusy smell (especially the yellows), brilliant colors and lacy leaves (also edible).

12" H Full Sun to Part Sun Low Water

Water Efficient Pollinator Friendly Small Space

Masterwort

'Abbey Road' *Astrantia major*

A dome of tiny florets of deep red flowers on black stems all summer.

18" H 24" W Full Sun to Part Sun Avg water

Pollinator Friendly

Meadow Checker Mallow

Sidalcea campestris **Native**

Base clump of lobed leaves with flowers rising on long stems. Blooms late spring to early summer. Flowers white with light pink to pink.

36" H Full Sun Low water

Water Efficient Pollinator Friendly

Meadow Rue

Thalictrum aquilegifolium

Fine-textured, compound, bluish-green foliage (resembling columbine or maidenhair fern). Lilac purple flowers bloom May-July. Deer resistant.

36" H 36" W Full Sun to Part Sun Avg water

Mexican Sage Bush

Salvia leucantha

An evergreen shrubby perennial that is often grown as an annual in cold climates. This sage is most noted for producing a very attractive late summer to frost bloom of showy bicolor flowers consisting of white corollas and longer-lasting funnel-form purple calyces. Flowers appear in dense, arching, terminal spikes that extend above the foliage.

36" H 36" W Full Sun Avg water

Water Efficient Pollinator Friendly

Milkweed

'Common' *Asclepias syriaca*

Sturdy plant on stout, upright stems with thick, broad-oblong, reddish-veined, light green leaves (to 8" long). Domed, slightly drooping clusters (umbels) of fragrant, pinkish-purple flowers appear from late spring well into summer. Stems and leaves exude a milky sap when cut or bruised. Flowers give way to prominent, warty seed pods (2-4" long) which split open when ripe releasing their numerous silky-tailed seeds for dispersal by the wind. Seed pods are valued in dried flower arrangements. Flowers are a nectar source for many butterflies and leaves are a food source for monarch butterfly larvae (caterpillars).

36" H 24" W Full Sun Avg/low water

Water Efficient Pollinator Friendly

Milkweed

'Showy' *Asclepias speciosa* **Native**

Light pink blooms of fragrant starry clusters appear in the summer months. Like other milkweeds, this species is an important food plant for the Monarch butterfly larvae.

24" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Milkwort

'Kamniski' *Polygala chamaebuxus*

Broadleaf evergreen groundcover creates a thick mat. Woody stems with narrow dull green leaves bloom pea-like pink/yellow flowers from March through May. Ground cover.

6" H 24" W Full Sun to Part Sun Avg/low water

Moss Phlox

'Emerald Blue' *Phlox subulata*

Creeping, groundcover with weather cold dependent evergreen leaves. Mid-spring tubular, 5-petaled flowers are pink to reddish purple and bloom April-May.

8" H 24" W Full Sun Avg water

Water Efficient Pollinator Friendly

Nodding Chocolate Flower

Glumicalyx goseloides

Evergreen groundcover with bell-shaped red flowers in summer, and chocolatey fragrance.

9" H 18" W Full to Part Sun Avg water

Obedient Plant

'Miss Manners' *Physostegia virginiana*

Pure white snapdragon-like flowers appear June and last through frost. This variety has a non-spreading habit.

36" H 24" W Full Sun to Part Sun High/Avg water

Pollinator Friendly

Ornamental Onion

'Millennium' *Allium x hybrida*

A compact ornamental onion with lavender-colored spherical flowers that bloom in summer. The upright green foliage makes for a great addition to containers or gardens. Sterile seeds and will not spread. Deer resistant.

18" H 18" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly Small Space

Oxeye Sunflower

Heliopsis helianthoides

An upright, clump-forming, short-lived perennial with serrated, smooth leaves. Features daisy-like flowers (2-3" diameter) with yellow-orange rays surrounding brownish-yellow center cones. Yellow blooms Jun-Aug.

48" H 36" W Full Sun Low water

Water Efficient Pollinator Friendly

Oxeye Sunflower

Heliopsis helianthoides

An upright clump-forming, sunflower-like perennial with toothed triangular foliage. The yellow to orange petals surround a brownish-yellow cone blooms stay Jun-Aug.

48" H 36" W Full Sun Low water

Water Efficient

Parahebe

'Waterfall Mist' *Parahebe catarractae*

Small evergreen sub-shrub with simple, toothed leaves and small saucer-shaped, white flowers in loose racemes in late summer.

18" H 24" W Full Sun to Part Shade Avg/low water

Water Efficient

Pearly Everlasting

Anaphalis margaritacea **Native**

Features attractive, narrow, woolly, silver-gray foliage and tiny, white, globular flowers with yellow center stamens arranged in flattish clusters (corymbs) on erect stems. Late-summer bloom. Fluffy flower heads are valued for dried flower arrangements.

36" H 24" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Penstemon or Beard's Tongue

'Blackbird' *Penstemon*

Slender dark burgundy flowers bloom all summer on red stems emerging from deep green foliage. Mulch in winter.

36" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Penstemon or Beard's Tongue

'Raven' *Penstemon x hybrida*

An easy, reliable favorite with dark, velvety purple-red blossoms on dark green foliage. It blooms summer to frost and prefers well-drained soil.

36" H 36" W Full Sun Avg/low water

Water Efficient Pollinator Friendly

Penstemon or Beard's Tongue

'Rondo Mix' *Penstemon*

Rondo Mix Beard Tongue has masses of beautiful spikes of pink tubular flowers with white throats rising above the foliage from late spring to mid-summer.

24" H 24" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Phlox

'Flame Pink' *Phlox paniculata*

Large clusters of fuchsia pink flowers with a darker pink eye They are produced in mid-summer atop relatively short, bushy clumps of medium green foliage. Deep rosey pink flowers bloom July to September.

18" H 12" W Full Sun to Part Sun Avg water

Pollinator Friendly

Phlox

'Laura' *Phlox paniculata*

An upright perennial that grows in a clump with stiff stems clad with conspicuously veined, elliptic, deep green leaves. Pink-purple to white tubular, fragrant flowers bloom July to September. Deer resistant.

48" H 36" W Full Sun to Part Shade Avg water

Pollinator Friendly

Pincushion flower

'Beaujolais Bonnet' *Scabiosa atropurpurea*

Rich, burgundy flowers with contrasting paler outer petals and white stamens appear for months on long wiry stems, perfect for cut flowers.

24" H 24" W Full Sun to Part Shade Avg water

Pollinator Friendly

Pineapple Lily**'Freckles'** *Eucomis comosa*

This dwarf pineapple lily has a vigorously clumping base with spotted leaves, wavy margins, and attractive rose red flowers that develop in late summer. Not winter hardy.

12' H 12" W Full Sun Avg water

Small Space**'Sparkling Burgundy'** *Eucomis comosa*

It features a basal rosette of strap-shaped, linear, wavy-edged, purple-spotted, dark green leaves which spread upward and outward. From each rosette, a thick, purple-spotted flower stalk rises to 24" tall in mid to late-summer bearing masses of tiny, starry, greenish-white flowers typically tinged with shades of purple.

18" H 18" W Full Sun Avg water

'Victoria' *Eucomis comosa*

Purple/white flowers on tall stalks late summer

24" H 24" W Full Sun Avg water

Prunella**'Summer Daze'** *Prunella x hybrid*

This hybrid makes a compact, semi-evergreen plant with masses of showy heads of large flowers in vibrant, rich pink to purple. The oak-leaved shaped foliage is also an attractive ground cover before its flowering season June through August.

12" H 12" W Full Sun to Part Sun Avg water

Pollinator Friendly**Queen of the Meadow****'Meadowsweet'** *Filipendula ulmaria*

Showy, branching clusters of short-stalked dusty flowers at the tip of the stem and arising from leaf axils in the upper plant. Deer resistant.

30" H 24" W Full Sun to Part Shade Wet to Avg water

Red Birds in a Tree*Scrophularia macrantha*

From early summer through mid-fall, cherry-red tubular flowers sit atop dark green, ovate, toothed leaves - much like little red birds in a tree. Deer resistant.

36" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly**Ring Bellflower***Symphyandra hofmannii*

Attractive basal rosettes, leafy stems and dense clusters of nodding, white campanula-like bell flowers. Excellent in the rock garden, where they will self-sow under good conditions. Biennial. Blooms July-Sep

18" H 12" W Full Sun to Part Sun Avg water

Rock Cress**'Spring Charm'** *Arabis blepharophylla*

Wall Cress is readily familiar as a widely planted rock garden or edging evergreen. Plants form a small mound of olive-green leaves, bearing masses of sweetly fragrant, deep-pink flowers for several weeks in spring.

12" H 24" W Full Sun Low water

Water Efficient**Rock Rose****'Wisley Pink /Sun Rose'** *Helianthemum nummularium*

Single, rose-pink flowers top soft silvery evergreen foliage in late spring to summer.

12" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

Rock Rose or Sun Rose'Dazzler' *Helianthemum nummularium*

Deep crimson flowers cluster on wiry stems are held above glossy evergreen foliage from late spring to summer. Deer resistant.

12" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space**Rodgersia***Rodgersia aesculifolia*

Dark green, basal leaves (to 12" across) with bronze tinting are often the main reason gardeners grow this plant. It is a substantial plant that will naturalize by thick black rhizomes. Blooms of creamy white (sometimes light pink) flowers rise in large, astilbe-like stalks atop stems rising well above the foliage. Flowers are fragrant and bloom Jun-Aug.

48" H 48" W Full Sun to Part Sun Avg water

Russian Sage'Longin' *Perovskia atriplicifolia*

A woody-based perennial of the mint family which typically features finely-dissected, aromatic (when crushed), gray-green leaves on stiff, upright, square stems. Blooms of two-lipped, tubular, light blue flowers from July to September.

60" H 48" W Full Sun Low water

Water Efficient**Sage***Salvia gregii*

A small deciduous sub-shrub with small, rounded, oval leaves that are aromatic when crushed. Two-lipped cream flowers bloom in whorls above the foliage on 3-6" stems from June to October. Best bloom occurs in late spring and fall, with sporadic bloom in the heat of the summer.

24" H 24" W Full Sun Low water

Water Efficient Pollinator Friendly**Salvia or Cedar Sage**'Hot Trumpets' *Salvia roemeriana*

Tubular crimson flowers bloom all summer on a low-growing perennial with heart-shaped, aromatic leaves. A very attractive Salvia for the front of the border. Deer resistant. Non-edible.

15" H 16" W Full Sun to Part Shade Avg/low water

Water Efficient Pollinator Friendly**Salvia or Garden Sage**'Caradona' *Salvia nemorosa*

Violet-purple flowers line dramatic, glowing purple stems in summer. This excellent selection from Germany is extremely long blooming. Deer resistant. Non-edible.

30" H 24" W Full Sun Avg/low water

Water Efficient Pollinator Friendly**Santa Barbara Daisy**'Profusion' *Erigeron karvinskianus*

Clouds of small white daisies aging to pink. Blooms from June to September. Perfect for trailing over containers. Deer resistant.

10" H 16" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly Small Space**Saxifraga**'Dentata' *Saxifraga x Geum*

Small star-shaped, white flowers on 8" stems in spring. Evergreen groundcover with serrated, round leaves.

10" H 12" W Full Sun to Full Shade High/Avg water

Sea Thrift*Armeria maritima* **Native**

Deep pink, global flowers on short stems top evergreen grassy foliage from spring into summer and again in fall. Deer resistant.

6" H 12" W Full Sun to Part Sun Low water

Water Efficient

Sedum'Cascade Stonecrop' *Sedum divergens* **Native**

Evergreen, deep-green, shiny leaves blush red in the sun or cold. Yellow flowers appear mid-summer. Slowly spreads to form a beautiful groundcover hot dry sites, evergreen. Deer resistant.

5" H 18" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

'Elsie's Gold Stonecrop' *Sedum spectabile*

This variegated groundcover produces lovely pastel pink buds that deepen to a dark pink as the flowers mature at end of summer and into fall. The variegated foliage looks best in full sun and can be pinched back to encourage bushy growth. Deer resistant.

28" H 24" W Full Sun Avg water

Water Efficient Pollinator Friendly Small Space

Sedum'Oracle' *Sedum fosterianum*

Star-shaped yellow flowers in summer, groundcover

3" H 12" W Full Sun Low water

Water Efficient Small Space

'Stonecrop' *Sedum oreganum* **Native**

Rosettes of smooth evergreen leaves are periodically tinged with pink. Yellow flowers appear in summer. Excellent spreading groundcover and deer resistant.

4" H 12" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

'Stonecrop' *Sedum confusum*

This mounding, evergreen groundcover is bushy and compact in growth. Large, bright yellow terminal panicles 3-4" across top shiny oval, green leaves.

12" H 15" W Full Sun Low water

Water Efficient Small Space

'Stonecrop' *Sedum ewersii*

Blue-gray leaves with red margins are topped by pink flowers in late summer. Deer resistant. Ground cover.

6" H 12" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

'Cape Blanco' *Sedum spathulifolium* **Native**

Tight rosettes of evergreen, succulent leaves are covered with a powdery, silver-white coating. Clusters of yellow flowers begin late spring. Needs good drainage, slow spreading groundcover, yellow flowers. Deer resistant.

3" H 12" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly Small Space

Sedum'Munstead Dark Red' *Sedum telephium*

The groundcover blooms mid-summer to frost with multi-toned flowers, from raspberry-red hues to deep bronze. Dusky, blue-green leaves clothe upright maroon stems.

18" H 18" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space

Sedum - Two Row Stonecrop'Fuldaglut' *Sedum spurium*

Consistent bronze-red foliage throughout the season. Rose-red, star-like flowers appear in August. Needs good drainage. Groundcover.

3" H 24" W Full Sun Low water

Water Efficient Pollinator Friendly Small Space**Shasta Daisy**'Luna' *Leucanthemum superbum*

This showy selection features double, pom-pom flowers that emerge yellow, mature to two-toned yellow and finally white. Blooms last for about 2 weeks.

20" H 20" W Full Sun to Part Sun Avg water

Pollinator Friendly Small Space**Shasta Daisy**'Macaroon' *Leucanthemum superbum*

This dwarf selection forms a low, tight mound and is well-branched with many stems. The double flowers start out yellow but open to bicolor white with yellow centers, then mature to white with gold centers. Blooms from Jun-Aug. Good soil drainage is important.

12" H 24" W Full Sun to Part Sun Avg water

Pollinator Friendly**Shasta Daisy**'Real Glory' *Leucanthemum x superbum*

Abundant, large, double-bloom white flowers with a bright sunny-yellow center.

24" H 20" W Full Sun to Part Sun Avg water

Water Efficient**Silverbush (Silverbush Morning Glory)***Convolvulus cneorum*

Glistening silver foliage forms a compact, evergreen shrub, displaying 2" ivory flowers with yellow centers in spring and summer. Performs best in gritty soils with sharp drainage.

24" H 36" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly Small Space**Spider Lily**'Purpurea/Purple Heart' *Tradescantia pallida*

This trailing tropical is not cold hardy. Often a houseplant its purple, narrow foliage is evergreen. Small, pink flowers bloom in summer.

10" H 20" W Part Sun to Part Shade Avg water

Spider Lily'Striped' *Tradescantia pallida*

Pink variegated foliage is a variation of Purple Heart. This trailing tropical is not cold hardy. Often a houseplant its pinky to purple foliage is evergreen. Small, pink flowers bloom in summer.

12" H 48" W Part Sun to Part Shade Avg water

Tree Mallow'Bredon Springs' *Lavatera*

Very refined, uniform rose-pink flowers adorn fresh green leaves Jun-Sept. A wonderfully tall herbaceous shrub for the back of a mixed border.

72" H 48" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly

Trumpet Creeper**'Madam Galen'** *Campsis x tagliabuana*

Produces trumpet-shaped, orange-red to red flowers which appear in loose, somewhat drooping clusters throughout the summer. It is a woody, clinging vine which attaches itself to structures and climbs by aerial rootlets.

25' H 12' W Full Sun to Part Shade Avg water

Pollinator Friendly**Twinspur****'Coral Canyon'** *Diascia integerrima*

Soft pink flowers are displayed on graceful spikes. This long-blooming beauty will brighten the garden from summer-fall! It makes a nice compact display in the front of the dry border. This variety loves drought!

15" H 16" W Full Sun to Part Shade Avg water

Water Efficient Pollinator Friendly Small Space**Virginia Creeper***Parthenocissus quinquefolia*

This is a vigorous tendril-climbing vine that will grow rapidly. It needs no support because it clings to surfaces (e.g., brick, stone or wood walls) by adhesive holdfasts (also called sucker disks) located at the tendril ends. Leaves emerge purplish in spring, mature to dull green in summer and change to attractive shades of purple and crimson red in fall. Greenish white flowers in late spring to early summer but are generally hidden by the foliage. Flowers give way to blue-black toxic berries which are also hidden by the foliage and are often not visible until autumn leaf drop. Birds eat the berries.

50' H 6" W Full Sun to Full Shade Avg/low water

Water Efficient**Wallflower****'Bowles Mauve'** *Erysimum linifolium*

Spikes of fragrant purple-mauve flowers and blue-grey foliage make a pleasing combination. This tough, long-blooming - from spring to early fall, herbaceous sub-shrub is perfect for the mixed border.

30" H 24" W Full Sun to Part Shade Low water

Water Efficient Pollinator Friendly**Wallflower****'Fragrant Star'** *Erysimum x Walfrastar*

Sweetly-scented yellow blooms complement bright, creamy-yellow margined leaves. Chocolate-purple flower buds make a dramatic contrast to the flowers and foliage. Blooms April through September.

24" H 24" W Full Sun to Part Shade Low

Water Efficient Pollinator Friendly**Western Columbine****'Red Columbine'** *Aquilegia formosa* **Native**

This bushy plant has delicate, blue-green, lobed foliage and pendant, yellow and red, spurred flowers. In spring blooms hang from ends of branches several stems and many divided leaves.

24" H 12" W Full Sun to Full Shade Low water

Water Efficient Pollinator Friendly Small Space**Western Coneflower***Rudbeckia occidentalis* **Native**

Stiff stems clad with lance-shaped dark green leaves emerge from low mound. Each flower has a black central cone ringed with yellow pollen and subtended by narrow, bright green sepals radiating outward from the cone base. Bloom Jun-Sept. Deer resistant.

36" H 24" W Full Sun to Partial Sun Avg water

Pollinator Friendly

Wormwood

'Silver Mound' *Artemisia schmidtiana*

Attractive silky soft and fern-like, bright silvery foliage has a mounding habit that is perfect as a rock garden plant or used as an edging. Do not cut back below visible buds in spring. Excellent soil drainage is essential. Deer resistant.

12" H 16" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Yarrow

Achillea millefolium **Native**

Noted for producing deeply-dissected, fern-like, medium green foliage. Tiny, long-lasting, white flowers throughout the summer. Foliage has a strong, somewhat spicy aroma that persists when used in dried arrangements. Deer resistant.

36" H 26" W Full Sun Avg/low water

Water Efficient Pollinator Friendly

Yucca

'Ivory Tower' *Yucca filamentosa*

Sword-like evergreen leaves are topped by tall spikes of ivory white blooms. Forms dramatic clumps with age. Deer resistant.

48" H Full Sun Low water

Water Efficient

Pond Plants**Allegheny Monkey Flower**

Mimulus ringens

This perennial typically grows tall on erect, square, sometimes branching stems. Features lilac-purple, snapdragon-like flowers and purportedly resembles the face of a smiling monkey. Blooms Jun through September.

36" H 12" W Full Sun to Part Shade Moist to wet soils

Canna glauca

'Davia'

Has very narrow, smooth, grey-blue foliage and upright pale creamy yellow flowers. Keep wet, Not hardy in Oregon.

48"H 2" W Full Sun Keep wet

Japanese Water Iris

'Pinstripe' *Iris ensata*

Grows in slowly expanding clumps with long, sword-shaped, linear green leaves with prominent midribs. Flowers have a distinctively flattened appearance. Blooms early-mid summer, keep in moist soil in summer, well-drained in winter.

36" H 24" W Full Sun to Part Shade Medium to Wet

Marsh trefoil

'Bog Bean' *Menyanthes trifoliata*

Grows in shallow water. White flowers May-Jun. Flower stalks and leaves rise well above the water surface from thick creeping rhizomes that spread indefinitely.

18" H 18" H Full Sun to Part Sun High water

Mexican Papyrus

Cyperus giganteus

Growing on leafless green stems are the showy umbrellas composed of up to 50 to 100 graceful, arching and drooping hair-like rays. This plant is a vigorous grower in or out of water, and in or out of the sun. Plant it up to 12 inches deep in water or in rich moist soil and protect it from wind. Green flowers bloom in summer. Marginally hardy.

100" H 12" W Full Sun to Full Shade Keep wet, or grow in pond

Miniature Umbrella Palm

'Gracillis' *Cyperus alternifolius*

A perennial sedge that features a grass-like clump of triangular green stems. Each stem is topped by a whorl that resembles the ribs of a raised umbrella. Flowers in greenish-brown clusters appear in summer. Keep wet, or grow in pond. Marginally hardy.

24" H 24" H Full Sun to Full Shade High water

Nardoo Fern

Marsilea drummondii

Four-leafed clover-like leaves create a mat on the water surface. Plant in mud at 9-36" depth of water. Australian aquatic fern, marginally hardy in Willamette Valley.

2" H 12" H Full Sun to Full Shade Plant 9" under water

Royal Pickerel

Pontederia dilatata

A robust plant with glossy, emerald-green foliage and spear shaped leaves. The flower spikes are shades of wedgewood-blue and are held above the foliage and bloom in late spring until frost. Very easy to grow. Plant roots about 7 inches below surface.

60" H 36" W Full Sun to Part Sun Grows in ponds

Pollinator Friendly

Seep Monkey Flower

'Possibly dead' *Erythranthe guttata* **Native**

Yellow blooms in winter/spring. Semi-evergreen leaves so sometimes deciduous and dormant in winter. Formerly known as *Mimulus guttata*.

36" H 12" W Full Sun to Part Sun Tolerates seasonal flooding

Pollinator Friendly

Water Buttercup

Ranunculus flammula

Soft yellow buttercup-like flowers daintily blanket this low-growing perennial from spring through summer. Best with constant moisture.

12" H 12" W Full Sun

Water Celery /Pennywort

'Flamingo' *Oenanthe javanica*

Tri-color variegated bluish-green foliage edged in pink/white with white umbels bloom in July. Used as ground cover as well as rain garden plant.

24" H 24" W Full Sun to Full Shade Moist soils

Water Hyssop

'Lemon bacopa' *Bacopa caroliniana*

Creeping perennial with succulent thick leaves, smelling of lemon if crushed. Leaves are oblanceolate and are arranged oppositely on the stem. The flowers are blue, with five petals once growth reaches surface.

40" H Full Sun to Part Sun

White Top Sedge

'Star Grass' *Dichromena colorata*

Plant in moist boggy site. Dark green grassy foliage topped with white star shaped flowers spring through fall. This attractive perennial grass makes a nice addition along the pond edge, in a stream bed or bog garden.

15" H 15" W Full Sun to Part Sun Moist boggy site

Sedge/Grass**California Fescue***Festuca californica*

Finely-textured grayish blue-green blades form a soft evergreen mound. Drooping, violet-tinged flower stems are held above the foliage from late spring to early summer. Deer resistant.

18" H 16" W Full Sun to Part Sun Avg/low water

Water Efficient**Cottongrass***Eriophorum angustifolium* **Native**

An intense green perennial sedge with extensive patches of erect stems with grass-like leaves, topped by 2-8 white, cottony heads in a cluster. Blooms in April or May. Keep soil moist.

24" H Full Sun Keep soil moist

Golden Millet'Aureum' *Milium effusum*

This is a low-growing grass that prefers moist, shady sites. Plants form a dense mound of beautiful chartreuse-yellow foliage in spring, bearing short spikes of green flowers in early summer. Often dormant in mid-summer. Tropical grass for boggy sites.

16" H 12" W AM Sun to Part Shade Tropical grass for boggy sites

Small Space**Hair Grass - Wavy***Deschampsia flexuosa*

An elegant prairie grass with a fine-textured delicate appearance. Wavy Hairgrass is a cool-season grass and greens-up early in the spring. Graceful feathery clouds of subtle purplish-brown color hover above the stems when the grass is in flower (May-June).

24" H Full Sun to Part Sun Drought tolerant

Water Efficient**Hairy Sedge**'Frosted Curls' *Carex comans*

Very graceful, finely-textured, pale silver-green leaves form a low arching mound of foliage. It makes a beautiful, soft-textured evergreen groundcover when planted in mass. Slow-grower. Low cascading mound of fine foliage. Deer resistant.

12" H 18" W Full Sun to Full Shade Low water

Water Efficient**Orange New Zealand Sedge***Carex testacea*

Bronze green foliage turns bright orange in cool season. Deer resistant.

18" H 18" W Full Sun to Part Sun Avg water

Purple Moor Grass'Variegata' *Molinia caerulea*

Dark green and cream leaves give off a golden glow, accented by ochre flower plumes in late summer. A compact slow growing grass. Deer resistant.

24" H 24" W Full Sun to Part Sun Consistent moisture

Sedge'Everlite' *Carex oshimensis*

A compact Japanese sedge most ideal for containers. 'Everlite' has a bright white central variegation with green margin. Deer resistant.

12" H 12" W Full Sun to Part Sun Avg water

Small Space

Sedge

'Phoenix Green' *Carex var.*

Grown for its attractive narrow, fine-textured, grass-like, bright green foliage. Foliage grows in a dense clump and narrow leaves are green with broad white margins. Cut foliage to the ground and remove in late winter.

18" H 18" W Part Shade to Full Shade Moist soil

Tufted Hair Grass

'Pixie Fountain' *Deschampsia cespitosa*

A low-grower with upright, dark green, evergreen foliage. Ethereal silvery-white blooms appear in June on sturdy stems, turning amber by early fall. Deer resistant.

18" H 18" W Full Sun to Part Sun Avg water

Pollinator Friendly

Variegated Sedge

'Banana Boat' *Carex siderosticha*

Deciduous, creeping, broad-leaved sedge. Insignificant brownish flower spikes appear on triangular stems in late spring. Foliage is a variegated bold medium green.

8" H 12" W Full Sun to Full Shade High/Avg water

'Banana Boat' *Carex siderosticha*

Deciduous, creeping, broad-leaved sedge. Insignificant brownish flower spikes appear on triangular stems in late spring. Foliage is a variegated bold medium green.

8" H 12" W Full Sun to Full Shade High/Avg water

Tender/Indoor Plants**Aloe Vera**

Aloe Vera

A tropical perennial that grows upright with stiff rosettes of lance shaped succulent green leaves. Leaves mature to a gray-green with teeth along edges and often yellow flowers bloom in summer at top end of leaf.

24" H 12" W Full Sun Low water

Water Efficient

Angel Wing Begonia

Begonia hyb

This hybrid begonia is named for the shape of its leaves that are dark green speckled with white on top deep red on the underside. May bloom with hanging delicate clusters from late winter through autumn. Annual repotting often necessary but can be trimmed to suit space.

48" H Partial Shade High/Avg water

Christmas Cactus

Schlumbergera truncata

This evergreen perennial has green, segmented and flattened stems with blooms appearing on end of stem. A winter flowering houseplant requires 13 hours of darkness to set its pink to purple blooms in fall. Ideal temperatures are between 70-80 degrees F.

12" H 24" W Part Shade Low water

Water Efficient Pollinator Friendly

Elephant's Tongue

Haemanthus albiflos

A member of the Amaryllis family this evergreen has attractive smooth and shiny oblong pale to dark green leaves. The flower head of numerous narrow white flowers appear from fall to winter.

10" H 24" W Part Sun to Part Shade Avg water

Water Efficient

Fiddle Leaf Ficus*Ficus lyrata*

An broadleaf evergreen tree noted for its lyre-shaped dark green shiny leaves. As a native of Africa it rarely produces fruit in Willamette Valley.

10' H 60' W Part Shade Low water

Water Efficient

Hawaiian Wax Plant*Hoya carnososa*

This evergreen trailing perennial can be trellised or grown in a hanging basket. It has waxed, glossy, elliptical leaves and produces clusters of fragrant, tiny, star-shaped flowers with red centers.

48" H 24" W Full Sun to Part Sun Low water

Water Efficient

Jade Plant*Crassula ovata*

Keep indoors. A succulent shrub with small pink or white flowers. An evergreen with thick branches but not frost hardy. It has thick, shiny, smooth leaves that grow in opposing pairs along the branches. Leaves are a rich jade green, although some may appear to be more of a yellow-green.

24" H 24" W Full Sun to Part Shade Low water

Lemon Button Ferns*Nephrolepis cordifolia*

Smallest of the Boston ferns this compact perennial evergreen has tiny golden green button-like leaflets on dark green, arching stems. A lemony scent is often expressed when the leaves are crushed.

12" H Partial Shade to Full Shade Keep Moist

Small Space

Orchid Cactus'Queen of the Night' Pink' *Epiphyllum oxypetalum*

Usually Epiphyllum shrub must be root bound before they will bloom. Flowering begins in May (pink and reds). Wintering not lower than 45-55F, water once/month. Requires good drainage and may need support as it grows.

12' H AM Sun to Part Shade Avg water

Orchid Cactus'Queen of the Night' Red' *Epiphyllum*

Usually Epiphyllum shrub must be root bound before they will bloom. Flowering begins in May (pink and reds). Wintering not lower than 45-55F, water once/month. Requires good drainage and may need support as it grows.

12' H AM Sun to Part Shade Avg water

Trees & Shrubs**Weeping Fig***Ficus benjamina*

This broadleafed evergreen tree rarely blooms in Oregon. Its light brown trunk can be shaped into twists and braids for interest. The leaves are glossy and oval to elliptical.

10'H Full Sun to Part Shade Avg water

Andromeda'Passion Frost' *Pieris japonica*

The rich green and yellow variegated foliage provides a striking backdrop for the clusters of purplish-red flowers that bloom in the spring. Performs best when planted in well-drained soil. Deer tend to avoid.

60" H 36" W Full Sun to Part Sun

Salal*Gaultheria shallon* **Native**

Salal is also known as Oregon Wintergreen. Oval-shaped, leathery, evergreen leaves. Pendant, urn-shaped flowers are white to pink. Its edible, dark-purple berries are actually fleshy sepals. Peak growth in shade.

70" H 36" W Part Shade to Full Shade Avg/low water

Water Efficient Pollinator Friendly

Abelia 'Kaleidoscope''Kaleidoscope' *Abelia grandiflora*

Bright, golden yellow variegation on medium green leaves along with brilliant red stems creates a striking kaleidoscope of color. Compact and works as a foundation plant, low hedge or in containers. Evergreen & blooms summer to early fall.

30" H 40" W Full Sun to Part Sun Avg water

Arborvitae'Frankie Boy' *Thuja orientalis*

Dwarf evergreen with an upright form. Unique foliage is thread-like and golden that turns a striking bronze-orange in the winter.

48" H 36" W Full Sun to Full Shade Avg water

Australian Mirror Bush'Coppershine' *Coprosma repens*

Copper-bronze tinged foliage. Mounding shrub and marginally hardy.

48" H 24" W Full Sun to Part Sun Avg water

Small Space

Australian Mirror Bush'Evening Glow' *Coprosma repens*

This very colorful upright-growing shrub has striking variegated foliage with irregular yellow patches. This glossy evergreen foliage turns bright orange-red in late summer to-fall and remains so until new growth in spring. The flowers are inconspicuous. Marginally hardy.

60" H 36" W Full Sun to Part Sun Avg water

Barberry'Golden Ruby' *Berberis thunbergii*

A handsome, compact shrub with colorful coral-orange foliage that lasts into autumn, then turns a brilliant mix of bright orange to brick red, accented with gold margins. Deer resistant.

12" H 24" W Full Sun to Part Sun Avg/Low water

Water Efficient

Barberry'Rose Glow' *Berberis thunbergii*

Brilliant rosy-red foliage sprinkled with green markings in spring make this hardy deciduous shrub stand out. Foliage color deepens with cooler temps. Bright red berries in fall to winter. Deer resistant.

48" H 48" W Full Sun to Part Sun Low water

Water Efficient

Bell Heather'C D Eason' *Erica cinerea*

Small hardy shrub with abundant, bright magenta, bell-like flower clusters. Magenta blooms in summer.

9" H 24" W Full Sun to Part Sun Avg water

Ceanothus'Victoria' *Ceanothus thyrsiflorus x var*

Also known as California Lilac. Fragrant dark-blue flowers appear in mid-spring on this lovely evergreen shrub with glossy green leaves. No summer watering once established in well draining soil. Deer resistant.

80" H 80" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Cotoneaster

'Bearberry' *Cotoneaster dammeri*

A dense, semi-evergreen trailing shrub is considered a groundcover. A compact grower that produces brilliant red berries and is easy to grow. Fruit produces best in full sun and occasional water.

12" H 72" W Full/pt Shade Low water

Water Efficient Pollinator Friendly

Coyote Brush

Baccharis pilularis **Native**

Low spreading form of the native evergreen shrub. Male and female flowers appear on different plants, producing creamy-white flowers late summer into fall. Deer resistant.

70" H 70" W Full Sun Low water

Water Efficient

Dogwood

'Red Osier' *Cornus sericea* **Native**

Grows rapidly forming many stems of red which are attractive in winter. Flat topped clusters of white flowers form in spring followed by blue-white berries.

15' H Full Sun to Part Sun Avg water

Pollinator Friendly

Drooping Fetterbush

'Rainbow' *Leucothoe fontanesiana*

Gracefully arching, striking red stems with colorful, creamy white and green mottled evergreen foliage with scarlet accents. Showy, drooping clusters of white flowers in spring Effective as hedge, or clip to create an attractive groundcover.

36" H 48" W AM Sun to Part Shade Avg water

Pollinator Friendly

Dwarf Boxwood

'Suffruticosa' *Buxus sempervirens*

A small, slow-growing broadleaf evergreen with soft and lush foliage of oval, glossy leaves. Deer resistant.

30" H 36" W AM Sun to Part Shade Avg/low water

Small Space

Escallonia

'Red Elf' *Escallonia var*

A medium-sized, spreading, evergreen shrub with small, glossy, oval leaves and tubular, red flowers in small clusters that bloom in early to mid-summer through autumn.

60" H 70" W Full Sun to Part Sun Avg water

Euonymus

'Emerald-N-Gold' *Euonymus fortunei*

An evergreen shrub sports bright green leaves with gold edges, turning pinkish red in fall and winter. Spreads by creeping stems that root where they touch the ground. Dense mounding form makes an excellent small hedge or border plant. Gently climbs with support, making a nice background.

24" H 48" W Full Sun to Part Sun Avg water

Water Efficient Small Space

'Green Spire' *Euonymus japonicus*

A well-behaved plant with glossy, green foliage for dense, narrow hedges or screens. Makes a great clipped hedge that requires minimal care for a formal appearance.

80" H 24" W Full Sun to Part Sun Avg water

Water Efficient Small Space

Euonymus

'Fort Emerald Gaiety' *Euonymus fortunei*

Deep, emerald green leaves edged in sparkling white are tinged with pink in winter. A mounding evergreen shrub with a dense, erect habit. Excellent for use in small clipped hedges and foundation plantings. Stems may root where they touch the ground, and if given support may be trained to climb.

48" H 60" W Full Sun to Part Sun Avg water

Water Efficient Small Space

False Holly

'Goshiki' *Osmanthus heterophyllus*

Goshiki translates from Japanese as "five colors". Its new leaves emerge red and quickly turn green. The green leaves are daubed with spots of creamy white, gray-green, and yellow-green. This lovely evergreen selection makes a great accent or hedge.

60" H 48" W Full to Part Sun Avg water

Fragrant Sweetbox

'Fragrant Sweetbox' *Sarcococca ruscifolia*

A beautiful shrub for shady areas! White spring flowers are small, but very fragrant. Blooms are followed by bright red ornamental fruit. Forms natural espalier against a wall. Deer resistant.

48" H 48" W Full Shade Low water

Water Efficient

Golden Privet

'Vicaryi' *Ligustrum x hybrid*

Multi-stemmed, deciduous shrub with a vase-shaped form. It features golden yellow leaves and aromatic, tubular-shaped, dull white flowers in late spring. Flowers are followed by small, dark, somewhat persistent, berry-like fruits.

100" H 100" W Full Sun to Part Sun Regular watering

Water Efficient Pollinator Friendly

Hebe

'E.C. Sterling' *Hebe ochracea*

Water Efficient Pollinator Friendly Small Space

Hebe

'Red Edge' *Hebe x hybr.*

Lilac-to-white flower spikes cover this small evergreen shrub mid-summer to fall. Tiny blue-green leaves are edged rosy-red and deepen to mauve during winter. One of the hardier Hebes in the Pacific Northwest.

18" H 24" W Full Sun to Part Sun Avg/low water

Pollinator Friendly Small Space

Hebe -Boxwood

Hebe buxifolia

This neat and tidy shrub is covered in stems containing perfectly stacked towers of shiny summer-green leaves. In mid-summer, pretty white tubular flowers top evergreen foliage that has the appearance of boxwood, but grows faster. It makes an excellent hedge when not grown in strong winds.

48" H 30" W Full Sun to Part Sun Avg/low water

Water Efficient Pollinator Friendly Small Space

Hydrangea

'Mophead' *Hydrangea macrophylla*

Blooms emerge June to August and color varies pink (alkaline soils) to blue (acid soils). Large serrated deciduous leaves grow on generally rounded shape shrub. Little pruning required.

36" H 36" W AM Sun to Part Shade Avg water

Hydrangea

'Glowing Embers' *Hydrangea macrophylla*

Large rounded clusters of enchanting pink blooms cover this upright, rounded shrub from summer through fall. It makes a charming companion to evergreen shrubs in foundation plantings or mass planted under tall trees.

70" H 100" W Part Sun to Part Shade Avg water

Japanese Snowball

'Summer Snowflake' *Viburnum plicatum f. tomentosum*

An upright cultivar with serrated-leaves and white lacecap-like flowers that bloom in late April-May. They continue to bloom sporadically through summer and sometimes into early fall.

10' H 10' W Full Sun to Part Shade Avg water

Water Efficient Pollinator Friendly

Juniper

'Gold Strike' *Juniperus horizontalis*

An exceptionally colorful, very low growing evergreen shrub, with yellow new foliage that matures to gold over the summer, taking on coral tones in fall. Protect from scorching sun.

6" H 48" W Full Sun to Part Sun Avg water

Lilac

'Monge' *Syringa vulgaris*

An upright, multi-stemmed, suckering, deciduous shrub with gray-green bark. It is noted for its spring (April-May) bloom of fragrant, single, deep reddish-purple flowers that bloom in showy clusters (each to 9" long). Deer resistant.

12' H 10' W Full Sun Avg water

Pollinator Friendly

Mock Orange

'Dwarf Snowflake' *Philadelphus x virginialis*

A dwarf flowering shrub with a natural vase shape. Wonderfully fragrant double flowers provide a delightful spring landscape accent in spring. Densely branched with attractive, lush green foliage. Cut stems are great for floral arrangements. Deciduous. Tolerant of road salt.

48" H 48" W Full Sun Avg water

'Natchez' *Philadelphus x virginialis*

This deciduous, fountain-shaped shrub is noted for its highly ornamental, large, white flowers, which carry a light, orange blossom fragrance that bloom in in mid-spring. Branches are covered with attractive lush green foliage. Tolerant of road salt.

100" H 70" W Full Sun Avg water

Mock Orange - Wild

Philadelphus lewisii **Native**

Clusters of fragrant white May-July flowers age to decorative brown seed pods. Attractive yellow fall color and shedding bark.

100" H 70" W Full Sun to Partial Sun Avg water

Water Efficient Pollinator Friendly

Ninebark

'Lemon Candy' *Physocarpus opulifolius*

Distinguished by its emerging lemon yellow spring leaves which gradually mature to chartreuse. This is a tough and durable shrub that features small white flowers at the branch ends in spring, peeling papery bark, red capsules from early to mid fall and no appreciable fall color.

30" H 36" W Full Shade to pt Shade Avg/Low water

Water Efficient

Ninebark

'Nanus' *Physocarpus opulifolius*

Nanus is a dwarf, spreading, densely-branched, deciduous shrub and is closely related to the genus Spiraea. Noted for its exfoliating bark (on mature branches) which peels in strips to reveal several layers of reddish to light brown inner bark for winter interest. Features small pink or white in late spring. Flowers give way to drooping clusters of reddish fruit. Leaves are dark green in summer changing to an undistinguished yellow in fall.

24" H 36" W Full to Part Sun Avg/Low water

Water Efficient

Physocarpus capitatus **Native**

Showy spring white flower tufts give way to dense grapelike foliage. Bark peels to show several layers with an interesting texture. Fall color can be intense red to orange.

15' H Full to Part Sun

Oceanspray

Holodiscus discolor **Native**

This deciduous shrub has slender arching branches and fuzzy green leaves. Creamy flowers bloom in drooping panicles 8" long from early to mid-summer.

10'H 80" W Full Sun to Part Sun Low water

Water Efficient Pollinator Friendly

Oregon Grape

'Creeping' *Mahonia repens* **Native**

Compound evergreen leaves look similar to holly. It forms a low-spreading groundcover with fragrant, small, yellow flowers that bloom from mid spring to early summer at the branch tips.

12" H 36" W Full Sun to Full Shade Low water

Water Efficient Pollinator Friendly

Oregon Grape

'Tall' *Mahonia aquifolium* **Native**

Known for its evergreen, holly-like leaves that turn deep burgundy in winter. New leaves emerge reddish in spring when the yellow flowers appear and are followed by blue berries.

60" H 60" W Full Sun to Full Shade Low water

Water Efficient Pollinator Friendly

Red Flowering Currant

Ribes sanguineum **Native**

Western native species with deep pink to red fuchsia-like flowers in drooping clusters in spring. Fruits are black with a white bloom, not particularly showy or palatable.

10' H Full Sun to Part Sun

Pollinator Friendly

Red-winged Rose

Rosa sericea omeiensis pteracantha

The striking enormous red-winged thorns make this plant so interesting although summer brings abundant and lovely cream-colored, four-petaled roses. Ferny foliage with more than eleven leaflets and pretty red hips offer additional visual interest.

10' H 70" W Full Sun Low water

Water Efficient

Rose

'Flower Carpet Pink' *Rosa x hybrid*

A non-stop summer show of vibrant, hot pink blooms with no deadheading or fancy pruning. This rose is heat and humidity tolerant, and fuss-free. It grows as a low shrub or as groundcover. Deciduous.

36" H 36" W Full Sun Avg water

Water Efficient

Rose

'Flower Carpet Red' *Rosa x hybrid*

A prolific bloomer that provides vivid color from spring until winter. Forms a low mound, covered with velvety, carmine red flowers with bright yellow centers. Highly disease resistant foliage emerges with a red tinge and matures to dark green with burgundy edges. Deciduous.

30" H 36" W Full Sun Avg water

Water Efficient

Silkyleaf Woodwaxen

'Vancouver Gold' *Genista pilosa*

Prostrate, mound-forming, semi-evergreen shrub with narrowly ovate, dark green leaves, silky beneath, and racemes of pea-like, bright yellow flowers in late spring and early summer. Used for erosion control.

8" H 29" W Full Sun to Part Sun Low water

Hawthorne

'Crimson Cloud' *Crataegus laevigata*

Shrubby, low branching tree with a dense head. Thorny branches and dark green leaves. Single red flowers and glossy red fruit. Good resistance to leaf blight.

18' H 15' W Full Sun Low water

Water Efficient

Mountain Ash

'Coral Fire' *Sorbus hupehensis*

A showy, globe-shaped tree that displays terrific fall color. Intriguing red stems on red-barked branches hold a showy display of white flower clusters followed by bright red berries. Deciduous. Fast growing tree that blooms in late spring to summer. Deer resistant.

30' H 30' W Full Sun Avg water

Pollinator Friendly

Western Red Cedar

Thuja plicata **Native**

This evergreen tree features horizontal branching with sprays of scale-like dark green foliage that is aromatic when crushed. Fibrous, aromatic, reddish-brown bark. Small, upright, light brown seed cones.

60' H 20' W Full Sun to Partial Shade Avg water

Vegetables**Artichoke**

'Romanesco' *Cynara cardunculus* var.

Good yields of very large and very flavorful bronze and purple artichokes. Globes are large and tender with a very fine flavor. Also an extremely decorative perennial that many include in a mixed perennial border. 85 days to maturity.

Full Sun

Arugula

'Grazia' *Eruca vesicaria* ssp.

Grazia has same small, fine serrated leaves as wild arugula, but has improved performance under both warm and cold growing conditions. Fabulously spicy greens that are great in salads and cooking. Slow-growing variety that stays low to the ground. Very heat and cold tolerant. Slow to bolt. Holds very well after harvest. 50 days to maturity.

Full Sun

Arugula

'Roquette' *Eruca vesicaria* ssp.

This peppery green is considered an annual herb and widely popular as a salad green, in pasta dishes and on pizza. The young tender leaves feature sweet flavor, and less peppery taste in contrast to the stronger, spicier flavor of mature greens. 30-35 days to maturity.

Full Sun

Beans - Bush

'Blue Lake Bush' *Phaseolus vulgaris*

Early and highly productive vigorous plants. The dark green 6-7" pods remain stringless at all stages of growth. Exceptional taste and tenderness, a perfect choice for highest quality fresh eating, freezing and canning. 45-55 days to maturity.

Full Sun

'Italian Bush' *Phaseolus vulgaris*

Green flat Italian bush variety, easy to grow, tender vines bear 7-8" long flat pods that are stringless with robust bean flavor. Excellent for freezing. 40-45 days to maturity.

Full Sun

Beans - Pole

'Kentucky Wonder Pole' *Phaseolus vulgaris*

Produces 7" long, silvery green, tender, high quality pods with a distinctive sweet flavor. Good for fresh eating, freezing or canning. Pole beans yield over a longer period of time than bush beans. Vines may require support. 50 days to maturity.

96" H Full Sun

'Rattlesnake Pole' *Phaseolus vulgaris*

Exceptional flavor fresh, shelled or dried! Dark green pods with purple streaks. High yields of tender, stringless, round, 7" pods. Seeds can also be used dry. 50 days to maturity.

Full Sun

Beets

'Golden' *Beta vulgaris*

Green leaves with attractive, yellow stems, orange skin, rich gold interior. Roots do not bleed like red beets when picked. Sweet and tender, especially when young & have a mild flavor when cooked. 45 days to maturity.

Full Sun

'Shiraz Tall Top' *Beta vulgaris*

Dual purpose beets selected for its lush, fast growing tops and 3 – 4" deep red globe shaped root. Tall, tender, and nutritious green tops. 45-50 days to maturity.

Full Sun

Broccoli

'Arcadia' *Brassica oleracea (Italica Grp)*

Rugged, vigorous with mid to late maturity. Big plants with heavy, very firm dark green domed heads with a unique 'frosted' appearance. Excellent side-shoot production. Prefers rich, moist soil. Amend soil with lime and compost. Water regularly. Cover with insect barrier cloth to keep plants bug free. 60-65 days to maturity.

Full Sun Avg water

Cabbage

'Caraflex' *Brassica oleracea (Capitata Grp.)*

Cone-shaped, pointed mini cabbage. Extremely uniform, small heads with good wrapper leaves for insect and sun protection. Inner leaves are tender and have an excellent, rich cabbage flavor. 65 days to maturity.

Full Sun

Carrots

'Little Fingers' *Dacus carota*

Tender, sweet miniature 3"-4" long carrots. Great for small space gardening or heavy soils. This variety does well in containers and is tender, almost core-less and of excellent quality. 61 days to maturity.

36" H 36" W Full Sun Avg water

Small Space

'Parmex' *Dacus carota*

Early, delicious, tender, bite sized, round carrots are suitable for fresh eating or freezing. Easy to grow in shallow soils and containers. 30-40 days to maturity.

Full Sun

'Rainbow Mix' *Dacus carota*

A colorful blend of delightfully tasty carrots. Amend soil with compost and lime. Water regularly. 65-70 days to maturity.

Full Sun

Cucumber

'Lemon' *Cucumis sativus*

Heirloom. This specialty cucumber is a Northwest favorite. Round, light yellow-green color. Juicy, sweet mild flavor. 58 days to maturity.

Full Sun

'Little Pickling Leaf' *Cucumis sativus*

Compact vines with small leaves produce high yields of medium, smooth, blocky, bright emerald green fruits. Good for pickling or eating fresh. Works well in the garden, trellised or in containers. 58 days to maturity.

Full Sun

'Spacemaster' *Cucumis sativus*

This cucumber is ideal for the small space gardener! A nicely compact plant the produces excellent yields of tasty, 7-8" long green cucumbers. Works well in wine barrels, tall planters, and hanging baskets. Vines that grow 2-3' long. 56-62 days to maturity.

Full Sun

Small Space

'Marketmore' *Cucumis sativus*

Extra-early. Delicious fresh eating, 8-9" long, slender, dark green cucumbers. The standard for slicing cucumbers. Disease resistant. 58 days to maturity.

Full Sun

Cucumber or Mouse Melon

'Mexican Sour Gherkin' *Melothria scabra*

Is a vine grown for its edible fruit. Fruit are about the size of grapes and taste like cucumbers with a tinge of sourness. Terrific in stir-fries; they can be pickled just like French gherkins, eaten raw in salads or put up like Polish dill pickles. They also can be chopped and added to salsas for extra texture and flavor.

Water Efficient

Eggplant

'Little Fingers' *Solanum melongena*

Slender fruit, 4-6" long with glossy black, tender skin and green calyx. Flesh has a silky texture with few seeds. Harvest when fruit is young and cook quickly for delicate flavor. 55-65 days to maturity.

Full Sun

'Millionaire' *Solanum melongena*

Healthy, upright plants produce extraordinary harvests of deep purple, slender fruit, 8 inches long. This exquisite Japanese variety is tender and delicious with a minimal seed cavity. 55 days to maturity.

Full Sun

'Ping Tung Long' *Solanum melongena*

Deep lavender, shiny fruit up to 12" long, sweet, mild, tender white flesh. Hardy, high yielding, disease resistant.

48" H Full Sun

'Thai Long Green' *Solanum melongena*

Long, light green fruits (1.5" x 10 ") of good quality. Flowers are deep lavender with green, soft, spineless calyxes.

24" H

Ground Cherry

'Pineapple' *Physalis peruviana*

Yellow ground cherry with a sweet and fruity flavor reminiscent of pineapple. Makes a unique & wonderful salsa. Short spreading vines produce abundantly. Open pollinated. Plant when soil and weather are warm. Plant seedlings deeply, leaving three sets of leaves above the soil line. Set the plants 3 feet apart in rows 3 to 4 feet apart. 75 days to maturity.

Full Sun

Kale

'Black Magic' *Brassica oleracea (Acephala group)*

Very dark, crinkled leaves have rich flavor that improves with frost. Harvest at the baby or mature stage for your culinary enjoyment. 60 days to maturity.

36" H Full Sun to Part Sun

Kale

'Dinosaur Lacinato (Nero di Toscano)' *Brassica oleracea (Acephala group)*

Heirloom! Gigantic, deep blue-gray leaves add great color, texture and flavor to salads. Grows well in heat and is extremely winter-hardy, becoming sweeter after a hard frost. 65 days to maturity.

Full Sun to Part Sun

'Rainbow Lacinato' *Brassica oleracea (Acephala group)*

This kale has the leaf qualities that Lacinato is loved for with the colors of red, purple and blue-green that make it beautiful. It's also more vigorous and cold hardy than other lacinatos. 60 days to maturity.

Full Sun to Part Sun

Lettuce

'Buttercrunch' *Latuca sativa*

Thick, juicy, bright green, butterhead type. Maintains its succulence without turning bitter and it gets even sweeter in cool weather. Slow to bolt. 45 days to maturity.

12" H 12" W Part Shade

Lettuce

'Gourmet Mix' *Latuca sativa*

A fabulous mix that combines color, shape, size and flavor for a real wow factor in the salad bowl. 25-35 days to maturity.
Part Shade

'Little Gem' *Latuca sativa*

Miniature green romaine heads have a blanched, thick heart and a sweet, buttery flavor. Heads are about 4 inches across and are prime eating from 4-6 inches tall. 40 days to maturity
Part Shade

'Red Sails' *Latuca sativa*

Very attractive deep burgundy red over green leaves that are ruffled and fringed. Nice and crisp with a taste that stays mild without bitterness. 55 days to maturity
Part Shade

'Wild Garden Mix' *Latuca sativa*

Instant lettuce diversity for cut salads. This vast assortment of dozens of varieties, includes selections of lettuce that remain unnamed and not available anywhere else other than in this unique mix. 40 days to maturity.
Part Shade

Melons

'Minnesota Midget' *Cucumis melo*

Heirloom! This very small, very early melon was introduced in Minnesota in 1948. Measuring just 4 inches across, it has sweet, orange flesh and grows on compact, 3-4-foot vines which produce good yields. 65-70 days to maturity.
Full Sun

Pak Choi

'Dwarf' *Brassica rapa*

This green stem variety sports an attractive hourglass shape topped by dark green glossy leaves and thick petioles that are extra tender and delicious. It is high yielding and has excellent heat tolerance. Great for succession planting from spring through fall. 30 days to maturity.

'Red Choi' *Brassica rapa*

Dark maroon leaves with green undersides and thin green petioles at full size. Excellent at micro mix, baby leaf and full size. 45 days to maturity.
Full Sun

Peas

'Oregon Sugar Pod (Snow Pea)' *Pisum sativum var.*

This variety produces smooth, stringless, 4" pods on dwarf plants 24-36" tall. Highly productive and easy harvests. 60 days to maturity.
Full Sun

'Sugar Anne (snap pea)' *Pisum sativum var.*

Dwarf, 2' vines are very early with a concentrated crop of petite, pale green, tasty pods. Sugar Ann produces about 10 days earlier than other snap peas. Culinary uses. 60 days to maturity.
Full Sun

Peppers - Hot

'Ancho Tiburon' *Capsicum annuum var.*

Poblano type. Typically used green in Mexican dishes like chile rellanos. Sweet thick flesh. Big sturdy plants produce loads of heavy spicy fruit. Perfect for stuffing fresh, it holds up well when cooked, and is ideal for drying whole and then grinding into Ancho spice. 75 days to maturity.
Full Sun

Peppers - Hot

'Jalapeno Conchos' *Capsicum annuum* var.

This is our medium heat jalapeno. Big, smooth, cylindrical, dark green fruit with moderate heat. Tall plants yield heavily. 65 days to maturity.

Full Sun

'Pimiento de Padron' *Capsicum annuum* var.

Traditionally used in immature green stage, mild when green, hot when red and fully mature. Sautéed in olive oil with a little sea salt and serve as appetizers. 65 days to maturity.

Full Sun

'Pretty in Purple' *Capsicum annuum* var.

Medium heat, ornamental edible. Beautiful, deep purple foliage, purple blossoms, black-purple 1" fruit that ripens to red. 80 days to maturity.

Full Sun

Peppers - Sweet

'Aura' *Capsicum annuum* var.

Tapered, thick-walled, 2-3 lobed golden yellow fruits are 4-5" long, and are deliciously sweet and fruity. Medium-size plants yield well. Early and easy to grow in diverse climates. 70-75 days to maturity.

Full Sun

'Carmen' *Capsicum annuum* var.

Italian "Bulls Horn" type. This is a great pepper for both roasting and fresh eating. Very sweet and delicious when partially or fully ripe. 60-80 days to maturity.

Full Sun

'Kapello' *Capsicum annuum* var.

Extremely sweet and delicious. 6" long tapered fruit are early to ripen, making it a winner for growing in the Pacific Northwest. Perfect for roasting and fresh eating. Plant in containers or beds 12" to 18" apart, when weather and soil have thoroughly warmed. Prefers rich soil, amended with compost and lime. Mulch to retain moisture and reduce weeds. Water well. 65 days to maturity.

Full Sun

'Lipstick' *Capsicum annuum* var.

4" long heavy, attractive, tapered fruit. Ripens early from dark green to glossy, rich red. Thick, juicy and sweet. Perfect for roasting and salsa. 65-85 days to maturity.

Full Sun

Radish

'Plum Purple' *Raphanus sativus*

Bright purple, almost maroon or burgundy skin with a crisp, white interior. Sweet and crunchy, never pithy. 25-30 days to maturity.

Rhubarb

'Victoria' *Rheum rhabarbarum*

Early maturing, large, tender, rosy-red stalks. Leaves not edible.

Salad Burnet

Poterium sanguisorba

A short to medium height grassland perennial with greyish pinnate leaves and a rounded flower head of small green flowers with bright red styles. The leaves smell and taste pleasantly of cucumber. Until recently known as *Sanguisorba minor*.

Spinach**'Renegade'** *Spinacia oleracea*

Smooth leaf type. Excellent for baby salad size. Consistent, high quality harvests for every season. 45 days to maturity
Full Sun

Squash (winter)**'Baby Blue Hubbard'** *Cucurbita maxima*

5-7 lb. small Hubbard. Tear dropped shaped squash with smooth, gray/blue skin and sweet, deep-orange flesh. Keeps well.
95 days to maturity.
Full Sun

'Bush Delicata' *Cucurbita maxima*

Expect nice yields of 1.5-2 lbs. oblong-shaped squash. Outside, they're creamy white with green stripes and flecks. Inside, the flesh is smooth and has a sweet nutty flavor with hints of brown sugar and butter. Tolerant of powdery mildew. Also known as sweet potato squash. These are improvements over the older strains of Delicata. 80 days to maturity.

Full Sun

Tomatillo**'de Milpa '** *Physalis philadelphica*

This prolific tomatillo has deep purple skin, and a wonderful sweet, tart flavor. Ideal for salsa or a decorative garnish. 75 days to maturity. Husks split when fruit is ripe.

Full Sun

'Toma Verde' *Physalis philadelphica*

Early maturing, medium to large, flat-round green fruit. Flavor is tart when young and becomes sweeter as it ripens. 60 days to maturity. Husks split when fruit is ripe.

Full Sun

Tomatillo**'Marianna's Peace'** *Solanum lycopersicum*

Pinkish-red, beefsteak-type, 1 to 2 pound fruits have thick red flesh, with a perfectly balanced sweet, yet acidic flavor. A potato-leaf variety that will produce good yields of fruits. 75-80 days to maturity

Full Sun

Tomato**'Oregon Cherry '** *Solanum lycopersicum*

Red, thin skinned, sweet flavor. A reliable maritime Northwest treat. 60 days to maturity.

Full Sun

'Oregon Spring' *Solanum lycopersicum*

4" bright red, bush variety with great early season flavor. Extra early. Reliable in the Northwest. 60 days to maturity.

Full Sun

Tomato'Paisano' *Solanum lycopersicum*

High yielding paste type, these vigorous plants yield an abundance of 3 oz. fruits that make outstanding soups and ketchup. An Italian sauce tomato with exceptionally high yields of firm but juicy fruits that are not only fine for peeling and canning, but delicious for fresh eating. The blocky, pear-shaped fruits are high in natural sugars which is rare in this type of tomato. The determinate plant habit is refined and compact, with good fruit set even under adverse conditions. Disease resistant. 70-80 days to maturity

Full Sun

'Principe Borghese' *Solanum lycopersicum*

Prolifically yield big clusters of 1-2 oz. red, plum shaped, crack-resistant paste tomatoes that are a great substitute for Roma tomatoes. Tomatoes are prized for drying because they retain more flavor than most other drying varieties. Italians are known for hanging the whole plant, loaded with fruit, up to dry. A great sauce tomato, or eat fresh in salads or can. Also prized for reconstituting in olive oil or crushing dried fruit into flakes to add to a sauce for quick thickening. 75-80 days to maturity.

Full Sun

'San Marzano' *Solanum lycopersicum*

Classic roma variety tomato. Prolific producer. Delicious, balanced acidic flavor, and meaty flesh makes this the best for sauces and paste. 80 days to maturity.

Full Sun

'Siletz' *Solanum lycopersicum*

7-10 oz. Extra-early "slicer". Deep red fruit, very good early tomato flavor. Great for the Northwest. 60 days to maturity

Full Sun

'Sungold' *Solanum lycopersicum*

Very prolific, very sweet tangerine/orange cherry, excellent flavor. The sweetest cherry we've ever tasted! "Candy" for the kids. Requires staking or caging. 60 days to maturity.

Full Sun

'Sweet Million' *Solanum lycopersicum*

Cherry tomato. Very prolific, early, super sweet red cherry. Crack resistant. A customer favorite. 60 days to maturity.

Full Sun

'Yellow Pear' *Solanum lycopersicum*

Cherry tomato. Highly productive. Beautiful yellow, pear-shaped tomatoes grown in clusters. Mild flavor, and low acid. 70 days to maturity.

Full Sun

Turnip'Hakuri' *Brassica rapa*

White "salad turnip". Best harvested young. Sweet and fruity flavor with crisp, tender texture raw. Use both tops and roots for cooking. 30-50 days to maturity.

Full Sun

Viola*Viola sp.*

Delicate, multi-colored flowers pinks, purples and whites offer a sweet to slightly sour taste. Like cool weather so will bloom in spring and fall (if kept watered during hotter summer).

Part Shade to Full Shade

Zucchini'Costata Romanesco' *Cucurbita pepo*

Prominently ribbed, medium gray-green with pale stripes. Our best tasting, best textured zucchini with a delicious nutty flavor, raw or cooked. If you don't want to be overwhelmed with too many fruits, try this one. 52 days to maturity.

Full Sun

Zucchini

'Tasty Patio Black' *Cucurbita pepo*
